

and (6) alien registration number, if applicable. TSA uses this information to perform a security threat assessment to determine whether the individuals pose, or are suspected of posing, a security threat.

TSA requires the following individuals to submit identifying information and fingerprints for a Criminal History Records Check (CHRC): Individuals designated as security coordinators, ASOs, and flight crewmembers that operate GA aircraft into and out of DCA. For flight crewmembers, TSA also uses this information to check FAA records to determine whether the flight crewmember has a record of violation of specified FAA safety regulations and to conduct CHRCs on flight crewmembers who have not successfully undergone a CHRC with the crewmember's current employer. As part of the threat assessment process, TSA shares the information with the Federal Bureau of Investigation (FBI). In addition to providing fingerprints and identifying information, ASOs must provide personal history information as well as weapon qualification information.

Aircraft operators must provide TSA with the flight plan and registration number of the aircraft that operates to or from DCA. This information is shared with FAA for purposes of tracking and identifying approved aircraft. TSA estimates a total of 4887 respondents annually. The total number of annual burden hours is estimated to be 5546.74 hours per year (4887 respondents × 1.135 hours per respondent = 5546.74 hours annually).
