*Description of Permit Modification Requested:* The Foundation issued a permit (ACA 2017–034) to David W. Johnston on January 6, 2017. The issued permit allows the permit holder and his agents to use unmanned aircraft systems (UAS) for photogrammetry and capture of behavior by video of whales and seabirds, including penguins. The UAS is also used to conduct transect-type surveys of penguin and other seabird colonies, including colonies at Avian Island, ASPA no. 117.

Now the applicant proposes a modification to his permit to use unmanned aircraft systems (UAS) for photogrammetry and population assessments by video of Antarctic seals. The permit holder plans overflights that may result in the disturbance of Antarctic fur seals (n=6000/year), crabeater seals (n=6000/year), leopard seals (n=2000/year), southern elephant seals (n=2000/year), and Weddell seals (n=2000/year). Authorization for the overflight of seals by UAS from the National Marine Fisheries Service under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) is pending.

*Location:* Antarctic Peninsula region; Torgersen Island; ASPA No. 117, Avian Island, Marguerite Bay.
