

maintain a housekeeping and maintenance plan; monitor worker health by providing medical surveillance; post warning signs and apply labels to shipping and storage containers of inorganic arsenic; develop and maintain worker exposure monitoring and medical records; establish and implement written compliance programs; and provide workers with information about their exposures and the health effects of exposure to inorganic arsenic.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment of 14,728 burden hours (from 637 to 15,365 hours) primarily due to the Agency's identification and inclusion of 688 covered coal-fired electric power plant establishments (including cogenerators) and workers at these establishments. The operation and maintenance cost increased from \$54,197 to \$1,078,069 due to the increase in establishments and workers, and also in the cost of exposure monitoring samples, medical examinations and chest x-rays. The Agency makes the new assumption that personal breathing zone samples, collected by a contract industrial hygienist and analyzed by a contract laboratory, will be used instead of vapor badges for exposure monitoring under the Standard.

Type of Review: Extension of a currently approved collection.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-454 and STN 50-455; NRC-2015-0002]

Exemption; Issuance; Exelon Generation Company, LLC

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a scheduling exemption in response to a December 10, 2013 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML13345B157), request from Exelon Generation Company, LLC (EGC or the licensee) for a one-time exemption from the requirement to exercise its offsite emergency plan biennially with full participation by each authority having a role under the radiological response plan. The request was supplemented by letter dated June 13, 2014 (ADAMS Accession No. ML14164A328). A series of deadly tornadoes struck Illinois 3 days prior to the scheduled exercise at the Byron Station. Because of the major involvement of the State of Illinois resources in response to the tornadoes, the Illinois Emergency Management Agency (IEMA), with the agreement of the U.S. Federal Emergency Management Agency (FEMA), decided to postpone participation in the Byron Station exercise from 2013 to early 2014, which is outside of the NRC's biennial requirement.

SUPPLEMENTARY INFORMATION: The following sections include the text of the exemption in its entirety as issued to EGC.

I. Background

The licensee is the holder of Facility Operating License Nos., NPF-37 and NPF-66, issued under Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, and which authorize operation of the Byron Station, Units 1 and 2. The license provides, among other things, that the facility is subject to all rules, regulations, and Orders of the NRC now or hereafter in effect. The facility consists of two pressurized-water reactors located in Ogle County, Illinois.

II. Request/Action

Per 10 CFR 50.12, "specific exemptions," the Commission may grant exemptions from the requirements of 10 CFR part 50 which: (1) Are authorized by law, (2) will not present an undue risk to the public health and safety, and (3) are consistent with the common defense and security. The Commission will not consider granting an exemption unless special circumstances as described in 10 CFR 50.12(a)(2) are present. Special circumstances are present whenever, among other things, application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule; or the exemption would provide only temporary relief from the applicable regulation and the licensee or applicant has made good faith efforts to comply with the regulation.

Part 50, Appendix E, Section IV.F.2.c requires that "[o]ffsite plans for each site shall be exercised biennially with full participation by each offsite authority having a role under the radiological response plan." Full participation when used in conjunction
