

- Minimize the burden of information collection on those who are to respond—including that obtained through appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

This submission requests comments on three primary and two secondary data collection instruments that will be used to collect follow-up data about individuals who are no longer actively participating in Job Corps. These youths either graduated from Job Corps or stayed in the program at least 60 days but left before completing graduation requirements (former enrollees). These data collection activities will be conducted with the following groups of recent Job Corps participants:

- Former enrollees who were placed in a job or school program; this group will be contacted 90 days after separation.
- Graduates who were placed in a job or school program; this group will be

contacted 90 days after initial placement;

- Graduates who were placed in a job or school program; this group will be contacted 6 months after initial placement;

- Graduates who were placed in a job or school program; this group will be contacted 12 months after initial placement.

The data collection instrument for graduates 90 to 120 days after their initial placement is called Interim Checkpoint for Eligibility (ICFE). Administration of the ICFE at this time will facilitate the key data collection at 6 and 12 months. This submission also requests approval for two brief questionnaires (one for employers and one for schools or training institutions) that will be used to collect re-verification data about initial placement for the subset of placed graduates and former enrollees that cannot be contacted directly.

To maximize the comparability of the data collected from the different subgroups of students, the ICFE, the 90-day follow-up for former enrollees, and the 6-month and 12-month follow-up

sections of the data collection instruments use modules with identical sets of questions on the same topics.

The questions are designed to obtain:

- Data to re-verify the initial job or school placements of placed graduates and former enrollees (only in the instruments administered at 90 days and the ICFE).
- Information about employment experiences in the previous week.
- Information about educational experiences in the previous week.
- Summary information about the work, school, and job search activities of those who were neither working nor in school the previous week.
- Information about satisfaction with the services provided by Job Corps.

Type of Review: Extension without changes.
