Franchised cable systems and other eligible services use the 2, 7, 12 and 18 GHz CARS bands for microwave relays pursuant to Part 78 of the Commission's Rules. CARS is principally a video transmission service used for intermediate links in a distribution network. CARS stations relay signals for and supply program material to cable television systems and other eligible entities using point-topoint and point-to-multipoint transmissions. These relay stations enable cable systems and other CARS licensees to transmit television broadcast and low power television and related audio signals, AM and FM broadcast stations, and cablecasting from one point (e.g., on one side of a river or mountain) to another point (e.g., the other side of the river or mountain) or many points ("multipoint") via microwave.

The filing is done for an initial license, for modification of an existing license, for transfer or assignment of an existing license, and for renewal of a

license after five years from initial issuance or from renewal of a license. Filing is done in accordance with 47 CFR Sections 78.11 to 78.40 of the Commission's Rules. FCC Form 327 consists of multiple schedules and exhibits, depending on the specific action for which it is filed. Initial applications are the most complete and renewal applications are the most brief. The data collected is used by Commission staff to determine whether grant of a license is in accordance with Commission requirements on eligibility, permissible use, efficient use of spectrum, and prevention of interference to existing stations.
