If your comments responsive to this notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this notice, it is important that you clearly designate the submitted comments as CBI. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to give confidential treatment to information you give to the agency by taking the following steps: (1) Mark each page of the original document submission containing CBI as "Confidential"; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information you are submitting is CBI. SUPPLEMENTARY INFORMATION: PHMSA received a special permit request from GSPC on March 16, 2020. The request is for GSPC's Index 818–9 Pipeline which is currently in carbon dioxide (CO₂) service under 49 CFR part 195 regulations. GSPC proposes to convert the line to natural gas service. Pipeline operators converting pipelines to natural gas service must follow 49 CFR 192.14: Conversion to service subject to this part.

GSPC is seeking a waiver from the requirements of 49 CFR 192.14(a)(4), which requires a pressure test to substantiate the maximum allowable operating pressure of the pipeline

(MAOP) in accordance with 49 CFR part 192, subpart J. In lieu of a pressure test, GSPC seeks a special permit to perform alternative risk control activities, based on 49 CFR part 192, subpart O, integrity management program principles, requirements, and assessments, as specified in the proposed special permit conditions. The 16-inch diameter Index 818–9 Pipeline has a maximum operating pressure of 2,875 pounds per square inch gauge (psig) while in CO₂ service as a 49 CFR part 195 regulated pipeline. GSPC proposes to lower the Index 818–9 Pipeline MAOP to 1,480 psig for operation as a 49 CFR part 192 regulated natural gas transmission pipeline.

The 16-inch diameter Index 818–9 Pipeline is 61-miles in length and begins at a point southeast of Heidelberg, Mississippi, and runs northeast to the Kemper County Power Plant in Kemper County, Mississippi. The Index 818–9 Pipeline is located in Jasper, Clarke, Lauderdale, and Kemper Counties in Mississippi.

The special permit request for the Index 818–9 Pipeline is available for review and public comment in the Docket No. PHMSA–2020–0040. We invite interested persons to review and submit comments on the special permit request in the docket. Please include any comments on potential safety and environmental impacts that may result if the special permit is granted. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. Comments received after the closing date will be evaluated, if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment it receives in making a decision to grant or deny this special permit request.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.
