- Rafting take-out locations. The rafting take-out locations at Luebner Lake and Trail Creek will include a platform that will allow for safe transfer of gear from the platform to the rail car. Additionally, at both sites a temporary storage facility (approximately 250 square feet) for rafting gear will be located at these locations from May-September.

Train Schedule

Currently the Alaska Railroad conducts daily business, carrying both freight and passengers, throughout the project area multiple times per day. In terms of passenger business, up to three trains per day visit the project area: The Coastal Classic and Glacier Discovery both operate daily from mid-May to mid-September and a train chartered by Cruise Ship companies periodically traverses the project area.

Authorization: National Environmental Policy Act of 1969 as amended (42 U.S.C. 4321-4346); Council on Environmental Quality Regulations (40 CFR parts 1500-1508); U.S. Department of Agriculture NEPA Policies and Procedures (7 CFR part 1b).

Reviewer's Obligation: The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and

Wisconsin Heritages, Inc. v. Harris, 490 F. Supp. 1334, 1338 (E.D. Wisc. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that substantive comments and objections are made available to the Forest Service at the time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewer may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the

National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

(**Authority:** 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21).
