SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

A prohibited species donation (PSD) program for salmon and halibut has effectively reduced regulatory discard of

salmon and halibut by allowing fish that would otherwise be discarded to be donated to needy individuals through tax-exempt organizations. Vessels and processing plants participating in the donation program voluntarily retain and process salmon and halibut bycatch. An authorized, tax-exempt distributor, chosen by the National Marine Fisheries Service (NMFS), is responsible for monitoring the retention and processing of fish donated by vessels and processors. The authorized distributor also coordinates the processing, storage, transportation, and distribution of salmon and halibut. The PSD program requires an information collection so that NMFS can monitor the authorized distributors' ability to effectively supervise program participants and ensure that donated fish are properly processed, stored, and distributed.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include email of electronic forms and mail of paper forms.

Proposed Information Collection; Comment Request; Alaska Halibut Catch Sharing Plan Survey

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

Numerous management measures have recently been proposed or implemented that affect recreational charter boat fishing for Pacific halibut off Alaska, including the adoption of a Halibut Catch Sharing Plan (78 FR 75843, December 12, 2013) in International Pacific Halibut Commission Regulatory Areas 2C and 3A that alters the way Pacific halibut is allocated between the guided sport (i.e., the charter sector) and the commercial halibut fishery. The Catch Sharing Plan (CSP) formalizes the annual process of allocating catch between the

commercial sector and charter sector and for determining harvest restrictions in the charter sector (78 FR 75843, December 12, 2013). In addition, the CSP allows leasing of commercial halibut individual fishing quota (IFQ) by eligible charter businesses holding a charter halibut permit (CHP). The IFQ pounds are leased in terms of number of fish, called guided angler fish (GAF), which are determined based on a conversion rate published by the National Marine Fisheries Service (NMFS). Leased GAF can be used by charter businesses to relax harvest restrictions for their angler clients, since the fish caught under the leased GAF would not be subject to the charter sector-specific size and bag limits that may be imposed—though the non-charter sector size and bag limit restrictions (currently two fish of any size per day) would still apply to charter anglers who are not using GAF.

To help inform potential future policy discussions about the CSP, NMFS Alaska Fisheries Science Center plans to conduct a survey that will collect information on general attitudes toward the CSP and the GAF leasing program from Area 2C and Area 3A charter boat businesses (CHP holders), and ask them to indicate their preferences for hypothetically relaxing specific features of the GAF leasing program that are employed in similar types of programs in both fisheries and non-fisheries contexts. This information could provide valuable information to the North Pacific Fishery Management Council in its evaluation of the current features of the CSP and provide information that may help it evaluate adjustments to the CSP. The survey will also provide a broad gauge of attitudes toward the program and its impacts on the charter sector and anglers.

II. Method of Collection

The method of data collection will be a survey of CHP permit holders implemented through a mail questionnaire.
