The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 1, 2.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notice published in the *Federal Register* on July 10, 2017 (82 FR 31786).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the *Federal Register*. In order to help ensure appropriate consideration, comments should mention OMB ICR Reference Number 201709-1220-001. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Application Details

Permit Application: 2018-027

1. *Applicant:* Bradford Clement, JOIDES Resolution Science Operator, International Ocean Discovery Program, Texas A&M University, College Station, TX 77845.

Activity for Which Permit is Requested: Waste Management. The applicant is seeking a waste management permit for activities associated with conducting four International Ocean Discovery Program (IODP) expeditions in the Antarctic and Southern Ocean waters. The applicant proposes to release or potentially release beacon weights, drilling mud, rotary core barrel coring bits, free fall funnels/re-entry cones, borehole casing, wiper pigs, and small amounts of fluorescent microspheres as a result of the normal operations of the *JOIDES Resolution* ocean drilling ship. Other standard hardware lowered below or over the side of the vessel would be retrieved, but may be subject to unintentional release.

Location: Ross Sea, Amundsen Sea, Scotia Sea, Southern Ocean, Antarctica.

Dates of Permitted Activities: January 4, 2018–July 20, 2019.

Permit Application: 2018-029

2. *Applicant:* Stephen C. Riser, School of Oceanography, University of Washington, Seattle WA 98195.

Activity for Which Permit is Requested: Waste Management. The applicant proposes to release five Argo floats in the Southern Ocean in the general vicinity of 0 degrees (the Date Line) and 65 degrees South, in the Weddell Sea. The floats will be deployed from the German research vessel *Polarstern*. These floats will collect profiles of temperature and salinity as a function of pressure in the upper 2000 m of the water column at

10-day intervals, and drift at a depth of 1000 m between profiles. Each float will transmit a file of data consisting of temperature, salinity, and dissolved oxygen from depths of 0–2000 m in the water column at 10 day intervals. The floats will continue to operate in this manner over a period of 5–6 years. The floats are fabricated with aluminum hulls and contain lithium batteries. The data that they product has been crucial to assessing warming and climate change in the Southern Ocean and Antarctic. The data will be publicly available in near real-time from the Argo Global Data Assembly Center.

Location: Weddell Sea, Antarctica.

Dates of Permitted Activities: January 1–March 31, 2018.
