Abstract: The Controlled Substances Act requires all businesses and individuals who manufacture, distribute, import, export, and conduct research and laboratory analysis with controlled substances to register with DEA. 21 U.S.C. 822, 21 CFR 1301.11 and 1301.13. Registration is a necessary control measure and helps to prevent diversion by ensuring the closed system of distribution of controlled substances can be monitored by DEA and the businesses and individuals handling controlled substances are qualified to do so and are accountable.

SUPPLEMENTARY INFORMATION:**I. Discussion**

The NRC has received, by letter, an
application from American Centrifuge
Operating, LLC, dba ACO, to amend
SNM-2011 for the American Centrifuge
Plant (ACP), located in Piketon, Ohio.
This LAR proposes to account for
continuing high-assay low-enriched
uranium (HALEU) production
operations for the 16-operating
centrifuge cascade at the ACP for three
3-year optional periods (9 years in total,
Phase III) beyond the NRC's current
authorization expiration date of June 30,
2025. The nominal rate of production
for the 16-operating HALEU cascade is
900 kg HALEU UF₆.

As documented in an administrative
completeness review, dated February
10, 2025, the NRC found the
application, acceptable for a technical
review. Prior to reaching a decision on
the request to amend Materials License
SNM-2011, the NRC will need to
conduct a review and make a
determination in accordance with the
Atomic Energy Act of 1954, as amended,
and the NRC's regulations. During the
technical review, the NRC will review
the application, as supplemented, in
areas that include, but are not limited
to, security, environmental protection
and financial aspects associated with
the contract between ACO and the
Department of Energy for Phase III. The
NRC's findings will be documented in a
safety evaluation report.
