I. Abstract

As part of NIST's charge for National Cybersecurity Awareness and Education outlined in the Cybersecurity Enhancement Act of 2014, the National Initiative for Cybersecurity Education (NICE) energizes and promotes a robust network and an ecosystem of cybersecurity education, training, and workforce development. NICE, led by NIST, fulfills this mission by coordinating with government, academic, and industry partners to build on existing successful programs, facilitate change and innovation, and bring leadership and vision to increase the number of skilled cybersecurity professionals helping to keep our Nation secure.

Further, the NICE Strategic Plan emphasizes a goal to promote the discovery of cybersecurity careers and multiple pathways. In support of this goal, Cybersecurity Career Awareness Week aims to inspire, educate, and engage children through adults to pursue careers in cybersecurity. The annual week-long celebration provides for learning about the contributions, innovations, and opportunities that can be found by exploring cybersecurity as a field of study or career choice. The NICE community is encouraged to organize and participate in activities and initiatives during the week that:

- Create excitement around increasing public awareness and engagement in building a strong cybersecurity workforce.
- Emphasize the demand and opportunities in the field of cybersecurity.
- Increase awareness around the multiple career options within the field of cybersecurity.
- Highlight the numerous pathways to enter the cybersecurity career field.
- Showcase programs that increase participation of women, minorities, veterans, persons with disabilities, and other underrepresented populations in the cybersecurity workforce.

- Advance the NICE Strategic Plan objective to inspire cybersecurity career awareness.

This collection is necessary to support the NICE Strategic Plan objective to inspire cybersecurity career awareness. The collection of information will allow the NICE Program Office to share with the public a compiled list of events and opportunities to learn about cybersecurity careers. Doing so will provide a resource for potential attendees, extend the reach of programs and efforts, serve as a source of metrics for outreach activities and impact, and encourage more stakeholders to get involved in National Cybersecurity Career Awareness Week.

The information gathered in this collection will be populated into publicly accessible list on nist.gov/nice on an on-going basis. The public will access this list to learn about events held by the public to raise cybersecurity career awareness with the intention to increase the reach of and participation at such events. The list will also serve as a resource for those wishing to access information on cybersecurity careers. The information collected will not be analyzed or changed prior to publishing.

Information collected includes basic contact information, such as name, however the data is referential in nature only. Records will not be retrieved by a personal identifier; therefore, this is not a Privacy Act System of Records and does not require a SORN or Privacy Act Statement. The primary goal for this collection is to learn what kind of events are happening and where.

II. Method of Collection

The primary method of collection will be via an electronic (internet) submission form.
