

ETC (1) use an increasing percentage of its legacy support toward the deployment, maintenance, and operation of voice and broadband networks that support 5G meeting the adopted performance requirements within its subsidized service area(s), and (2) meet specific 5G broadband service deployment coverage requirements and service deployment milestone deadlines that take into consideration the amount of legacy support the carrier receives.

In order to gain a complete understanding of the current service offerings of each competitive ETC receiving legacy high-cost support for mobile wireless services, the Commission adopted rules that require each such competitive ETC to file an initial report containing information and certifications about its current mobile service offerings in each of its subsidized service areas and how it is using legacy support and whether it is offering mobile services in its subsidized service areas at rates that are reasonably comparable to those charged in urban areas. See 47 CFR 54.322(g), (h). The information and certifications provided in these initial reports will be used by the Commission to ensure that competitive ETCs receiving legacy high-cost support for mobile wireless services deploy 5G service by in their subsidized service areas consistent with the rules adopted by the Commission in the *5G Fund Report and Order*.

A revision to the currently approved information collection requirements under OMB 3060–1291 is necessary in order to remove a requirement that applies only to the annual reports that must be filed by competitive ETCs receiving legacy high-cost support for mobile wireless services information requirement, which was inadvertently included in the information collection under OMB 3060–1291 as previously approved by OMB.
