Federal Railroad Administration

[Docket No. FRA–2023–0002–N–6]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA will seek approval of the Information Collection Request (ICR) abstracted below. Before submitting this ICR to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in the ICR.

DATES: Interested persons are invited to submit comments on or before May 23, 2023.

ADDRESSES: Written comments and recommendations for the proposed ICR should be submitted on regulations.gov

to the docket, Docket No. FRA–2023–0002. All comments received will be posted without change to the docket, including any personal information provided. Please refer to the assigned OMB control number (2130–0560) in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: arlette.mussington@dot.gov or telephone: (571) 609–1285 or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: joanne.swafford@dot.gov or telephone: (757) 897–9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8–1320.12.

³ Totals may not add due to rounding.

Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal statutes and regulations mandate. In summary, FRA reasons that comments received will advance three objectives: (1) reduce reporting burdens; (2) organize information collection requirements in a "user-friendly" format to improve the use of such information;

and (3) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Use of Locomotive Horns at Highway-Rail Grade Crossings.

OMB Control Number: 2130-0560.

Abstract: FRA plans to publish in the **Federal Register** a final administrative rule on its procedures for service of documents in railroad safety enforcement proceedings and other administrative updates. This rule will update FRA's railroad safety enforcement procedures and rules of practice to require electronic service of documents. Specifically, this rule modernizes 49 CFR part 209's provisions and other FRA procedures regarding service to require service through electronic methods of transmission. For example, with respect to updating FRA's rules of practice to require electronic service of documents, this rule will remove the certified mail requirements in 49 CFR part 222 and provide for electronic submission of documents to FRA and other affected

parties (such as railroads and State agencies).

This 60-day notice provides the public with the opportunity to comment on the modifications made to eliminate the need for certified mail in sections 222.39, 222.43, 222.47, and 222.51. These adjustments will also decrease the burden hours by 47 hours, reducing the current inventory's 7,254 hours to 7,207 hours in the requesting inventory. Additionally, this rule will reduce the certified mailed cost by \$5,000 annually to the affected parties.

The other provisions under parts 209, 211, 212, 216, 231, 233, 235, 238, and 239 with respect to electronic methods of transmission requirements will not impact the current PRA inventory under multiple OMB control numbers¹ since the affected parties are already submitting their written products electronically to FRA.

Type of Request: Revision of a currently approved collection.

Affected Public: Businesses.

Form(s): N/A.

Respondent Universe: 784 railroads/645 public authorities.

Frequency of Submission: On occasion.
