BILLING CODE 4510-FN-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. This is the second notice for public comment; the first was published in the **Federal Register** at 72 FR 3167, and no substantial comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science

Foundation, 725-17th Street, NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send e-mail to splimpto@nsf.gov. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: International Cover Page Addendum.

OMB Control No.: 3145-New.

Expiration Date of Approval: Not applicable.

Abstract: The Office of International Science and Engineering within the Office of the NSF Director will use the International Cover Page Addendum. Principal Investigators submitting proposals to this Office will be asked to complete an electronic version of the International Cover Page Addendum. The Addendum requests foreign counterpart investigator/host information and participant demographics not requested elsewhere in NSF proposal documents.

The information gathered with the International Cover Page Addendum serves four purposes. The first is to enable proposal assignment to the program officer responsible for activity with the primary countries involved. No current component of a standard NSF proposal requests this information. (The international cooperative activities box on the standard NSF Cover Page applies only to one specific type of activity, not the wide range of activities supported by OISE.) NSF proposal assignment applications are program element-based and therefore can not be used to determine assignment by country. The second use of the information is program management. OISE is committed to investing in activities in all regions of the world. With data from this form, the Office can determine submissions by geographic region. Thirdly, funding decisions can not be made without details for the international partner not included in

any other part of the submission process. The fourth section, counts of scientists and students to be supported by the project, are also not available elsewhere in the proposal since OISE budgets do not include participant support costs. These factors are all important for OISE program management.

Estimated Number of Annual Respondents: 600.

Burden on the Public: 150 hours (15 minutes per respondent).

Dated: March 28, 2007.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-305]

Dominion Energy Kewaunee, Inc.; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Dominion Energy Kewaunee, Inc. (the licensee) to withdraw its April 6, 2006, application for proposed amendment to Facility Operating License No. DPR-43 for the Kewaunee Power Station, located in Kewaunee County, Wisconsin.

The proposed amendment would have revised the facility Updated Safety Analysis Report to allow the use of a different methodology for determining the design requirements necessary for protecting safety-related equipment from damage by tornado generated missiles.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on May 23, 2006 (71 FR 29673). However, by letter dated March 19, 2007, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated April 6, 2006, and the licensee's letter dated March 19, 2007, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and
