Greenbrier Pipeline Company, LLC; Notice of Availability of the Final Environmental Impact Statement for the Proposed Greenbrier Pipeline Project

February 28, 2003.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared this final environmental impact statement (FEIS) on the natural gas pipeline facilities (the Greenbrier Pipeline Project) proposed by Greenbrier Pipeline Company, LLC (GPC) in the above-referenced dockets. The application and other supplemental filings in these dockets are available for viewing on the FERC Internet Web site (<http://www.ferc.gov>). Click on the “FERRIS” link, select “General Search,” then “Docket #” on the menu, and follow the instructions.

The FEIS was prepared to satisfy the requirements of the National Environmental Policy Act (NEPA). The staff concludes that approval of the proposed project with appropriate mitigating measures, as recommended, would result in some adverse environmental impacts. The FEIS evaluates alternatives to the proposal, including system alternatives, route alternatives, and route variations.

The purpose of the project is to create gas supply diversity and to meet a portion of the growing energy market in the South Atlantic region. The project would be designed to meet a variety of anticipated loads, including the growth of two local distribution companies, four natural gas-fired electric generation plants, and a natural gas marketer. The project is fully subscribed and would transport up to 600,000 decatherms per day of natural gas.

The proposed pipeline would extend from east of Clendenin, Kanawha County, West Virginia, through West Virginia, southwestern Virginia, and North Carolina to its terminus near Stem, in Granville County, North Carolina. It would consist of 275.6 miles
