of Service and shall file proof of service on the Electronic Document Information System (EDIS).

The Commission vote for this determination took place on April 18, 2022.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission. Issued: April 18, 2022.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board's ad hoc Committee on Elections hereby gives notice of the scheduling of a teleconference for the transaction of National Science Board business, pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: April 26, 2022, from 4:00–4:30 p.m. EDT.

PLACE: This meeting will be held by teleconference through the National Science Foundation.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Committee Chair's opening remarks; discussion of additional information proposed for the Board book associated with the Chair and Vice Chair elections related to Board members who are eligible for reappointment.

CONTACT PERSON FOR MORE INFORMATION:

Point of contact for this meeting is: Andrea Rambow, arambow@nsf.gov, 703–292–7000. You may find meeting updates at https://www.nsf.gov/nsb/meetings/index.jsp#up.

Chris Blair,

Executive Assistant to the National Science Board Office.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Social, Behavioral & Economic Sciences; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92– 463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Advisory Committee (AC) for Social, Behavioral & Economic Sciences (#1171).

Date and Time: May 20, 2022, 11:00 a.m.-5:00 p.m. (ET).

Place: NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Virtual).

Advance Registration is Required: SBE Spring 2022 Advisory Committee Meeting Registration Link.

Type of Meeting: Open.

Contact Person for More Information: John Garneski, Office of the Assistant Director, Directorate for Social, Behavioral and Economic Science; National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; Telephone: (703) 292–8700.

Purpose of Meeting: To provide advice, recommendations and counsel on major goals and policies pertaining to Social, Behavioral and Economic Sciences (SBES) programs and activities.

Agenda Items

- Welcome, Introductions, Approval of Previous Advisory Committee (AC) Meeting Summary, Preview of Agenda
- Directorate for Social, Behavioral, and Economic Sciences (SBES) Update
- National Center for Science and Engineering Statistics (NCSES) Organizational Realignment and Updates
- New AC Member Presentation
- Meeting with NSF Leadership
- SBE future year planning and visioning
- Committee on Equal Opportunities in Science and Engineering (CEOSE) Update
- Advisory Committee for Environmental Research and Education (AC–ERE) Update

Dated: April 19, 2022.

Crystal Robinson,

Committee Management Officer. [FR Doc. 2022–08659 Filed 4–21–22; 8:45 am]

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation. **ACTION:** Submission for OMB Review; Comment Request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register** and no comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAmain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation. 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to splimpto@ nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays). Comments regarding this information collection are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Program Monitoring Data Collections for National Science Foundation (NSF) Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR) Programs.

OMB Number: 3145–NEW. Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection for post-award output and outcome monitoring system.

outcome monitoring system.

Abstract: The NSF SBIR/STTR
programs focus on transforming
scientific discovery into products and
services with commercial potential and/
or societal benefit. Unlike fundamental

or basic research activities that focus on scientific and engineering discovery itself, the NSF SBIR/STTR programs support the creation of opportunities to move fundamental science and engineering out of the lab and into the market at scale, through startups and small businesses representing deep technology ventures. Here, deep technologies refer to technologies based on discoveries in fundamental science and engineering. The NSF SBIR/STTR programs are designed to provide nondilutive funding (financing that does not involve equity, debt, or other elements of the business ownership structure) at the earliest stages of technology research and development.

The NSF SBIR/STTR programs are Congressionally mandated. By investing federal research and development funds into startups and small businesses, NSF hopes to stimulate the creation of novel products, services, and solutions in the private sector, strengthen the role of small business in meeting federal research and development needs, increase the commercial application of federally supported research results, build a strong national economy, and increase and develop the US workforce, especially by fostering and encouraging participation of socially and economically disadvantaged and women-owned small businesses.

Both the NSF SBIR and NSF STTR programs have two phases: Phase I and Phase II. Phase I is a 6–12 month experimental or theoretical investigation that allows the awardees to determine the scientific, technical, and commercial merit of the idea or concept. Phase II further develops the proposed concept, building on the feasibility of the project undertaken in Phase I, with a goal of working toward the commercial launch of the new product, process, or service being developed.

The NSF SBIR/STTR programs request the Office of Management and Budget (OMB) approval of this clearance that will allow the programs to improve the rigor of our surveys for evaluations and program monitoring, as well as to initiate new data collections to monitor the immediate, intermediate, and long-term outcomes of our investments by periodically surveying the startup businesses and their founders/co-founders involved in the businesses. The clearance will allow the SBIR/STTR programs to rigorously develop, test, and implement survey instruments and methodologies.

The primary objective of this clearance is to allow the NSF SBIR/ STTR programs to collect characteristics, output, and outcome information from the startup companies funded by the programs. This collection will enable the evaluation of the impacts of our investments in technology translation and innovation over time. The second, related objective is to improve our questionnaires and/or data collection procedures through pilot tests and other survey methods used in these activities. Under this clearance a variety of surveys could be pre-tested, modified, and used.

Following standard OMB requirements, NSF will submit to OMB an individual request for each survey project we undertake under this clearance. NSF will request OMB approval in advance and provide OMB with a copy of the questionnaire and materials describing the project.

Data collected will be used for planning, management, evaluation, and audit purposes. Summaries of output and outcome monitoring data are used to respond to queries from Congress, the Small Business Administration (SBA), the public, NSF's external merit reviewers who serve as advisors, including Committees of Visitors (COVs), NSF's Office of the Inspector General, and other pertinent stakeholders. These data are needed for effective administration, program monitoring, evaluation, outreach/

marketing roadmaps, and for strategic reviews and measuring attainment of NSF's program and strategic goals, as identified by the President's Accountable Government Initiative, the Government Performance and Results Act Modernization Act of 2010, Evidence-Based Policymaking Act of 2018, and NSF's Strategic Plan.

All questions asked in the data collection are questions that are NOT included in the annual, final or outcomes reports, and the intention is to ask the grantees even beyond the period of performance on voluntary basis in order to capture impacts of the research that occur during and beyond the life of the award.

Grantees will be invited to submit information on a periodic basis to support the management of the NSF SBIR/STTR investment portfolio. Once the survey tool for a specific program is tested, grantees will be invited to submit these indicators to NSF via data collection methods that include, but are not limited to, online surveys, interviews, focus groups, phone interviews, etc. These indicators are both quantitative and descriptive and may include, for example, the characteristics of project personnel, sources of funding and support, knowledge transfer and technology translation activities, patents, licenses, publications, descriptions of significant advances, and other outcomes of the funded efforts.

Use of the Information: The data collected will be used for NSF internal and external reports, historical data, program level studies and evaluations, and for securing future funding for the maintenance and growth of the NSF SBIR/STTR programs. Evaluation designs could make use of metadata associated with the award and other characteristics to identify a comparison group to evaluate the impact of the program funding and other interesting research questions.

ESTIMATE OF PUBLIC BURDEN

Collection title	Number of respondents	Annual number of responses/ respondent	Annual hour burden
NSF SBIR/STTR Program Monitoring	400 startups per year	1 1	100 200
Total			300

For life-of-award monitoring, the data collection burden to awardees will be limited to no more than 30 minutes of the respondents' time in each instance.

Respondents: The respondents are either Principal Investigators (PIs) of the startup businesses that the NSF SBIR/STTR Programs awarded, founders, co-

founders, and/or key personnel of the startup businesses. In the case of Business Survey, only one response from each startup/small business is anticipated.

Estimates of Annualized Cost to Respondents for the Hour Burdens: The overall annualized cost to the respondents is estimated to be \$26,400. The following table shows the annualized estimate of costs to PI/ Founders/Business Partners respondents, who are generally university assistant professors. This estimated hourly rate is based on a report from the American Association of University Professors, "Annual Report on the Economic Status of the Profession, 2020–21," Academe, March–April 2021, Survey Report Table

1. According to this report, the average salary of an assistant professor across all types of doctoral-granting institutions (public, private-independent, religiously affiliated) was \$91,408. When divided by the number of standard annual work hours (2,080), this calculates to approximately \$44 per hour.

Respondent type	Total burden hours	Average hourly rate	Estimated annual cost
Pls, Founders, Business Partners	300	\$44	\$13,200

Estimated Number of Responses per Report: Data collection for the collections involves all awardees in the programs involved.

Dated: April 18, 2022.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to *splimpto@nsf.gov*. Individuals who use a telecommunications device for the deaf

(TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays). Comments regarding this information collection are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Program Monitoring Data Collections for the National Science Foundation (NSF) Innovation Corps (I-Corps) Program. OMB Number: 3145–NEW.

Type of Request: Intent to seek approval to establish an information collection for post-award output and outcome monitoring system.

Abstract: The National Science Foundation (NSF) Innovation Corps (I-Corps) Program was started in 2011 to develop and nurture a national innovation ecosystem built upon fundamental research that guides the output of scientific and engineering discoveries closer to the development of technologies, products, and services that benefit society.

The goal of the I-Corps Program is to use experiential education to help entrepreneurial researchers reduce the time necessary to translate promising ideas from the laboratory bench to widespread implementation. In addition to accelerating technology translation, the NSF I-Corps program also seeks to reduce the risk associated with technology development conducted

without insight into industry requirements and challenges.

The NSF I-Corps Program is designed to support the commercialization of "deep technologies," those revolving around fundamental discoveries in science and engineering. The program addresses the skill and knowledge gaps associated with the transformation of basic research into deep technology ventures. The program enables entrepreneurial researchers in deep technologies to receive support in the form of entrepreneurial education, industry mentoring, and funding to accelerate the translation of knowledge derived from fundamental research into emerging products and services that may attract subsequent third-party funding. I-Corps training and infrastructure together represent an important investment for NSF and the Nation, as directed by the American Innovation and Competitiveness Act (AICA), Public Law 114-329, Section

These selected researchers form teams and participate in the I-Corps Teams Program Curriculum. An I-Corps team includes the Entrepreneurial Lead (EL), Technical Lead (TL) or the Principal Investigator (PI), and the Industrial Mentor (IM). During the training program, the team is expected to spend significant time conducting active customer discovery, including interviewing potential customers and potential partners. The outcomes of I-Corps Teams projects will be threefold: (1) A decision on a clear path forward based on an assessment of the business model, (2) substantial first-hand evidence for or against product-market fit, with the identification of customer segments and corresponding value propositions, and (3) a narrative of a compelling technology demonstration for potential partners.

The NSF I-Corps program requests the Office of Management and Budget (OMB) approval of this clearance that will allow the programs to improve the rigor of our surveys for evaluations and
