SUPPLEMENTARY INFORMATION:

Title: Foodborne Illness Outbreak Investigation Survey for FSIS Public Health Partners.

OMB Number: 0583–0175.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat, poultry, and egg products are safe, wholesome, and properly labeled.

FSIS is requesting renewal of an approved information collection regarding partner collaboration in response to illness outbreaks associated with FSIS-regulated food products. This information collection continues to inform FSIS partner outreach efforts to effectively investigate and prevent foodborne illnesses. There are no changes to the existing information collection. The approval for this

information collection will expire on November 30, 2024.

FSIS's Office of Public Health Science (OPHS) provides the scientific leadership necessary for the support of science-based food safety programs and policies implemented to reduce foodborne illnesses and deaths associated with FSIS-regulated products. As part of OPHS, the Applied Epidemiology Staff (AES) collaborates with public health partners in local, state, and federal government agencies to detect, respond to, and prevent foodborne illnesses, outbreaks, and food adulteration events. Effective communication between partners facilitates rapid investigation and control measures.

To promote successful partnerships, FSIS administers a series of surveys regarding foodborne illness outbreak investigations to its partners, including employees of state, territorial, and local governments. This also occurs as part of the after-action review process. The results of these surveys help FSIS prioritize outreach efforts. Surveys are conducted as needed, including as part of foodborne illness outbreak after-action reviews.

FSIS has made the following estimates based upon an information collection assessment:

Respondents: FSIS partners, including employees of state, territorial, and local governments.

Estimated Number of Annual Surveys: 20.

Estimated Number of Respondents per Survey: 10.

Estimated Participation Time per Survey in Minutes: 20.

Estimated Total Burden on Respondents: 67 hours.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of FSIS' functions, including whether the information will have practical

utility; (b) the accuracy of FSIS' estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.
