SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new survey of coastal managers to determine their needs and potential uses for ecological forecasts or scenarios. Coastal managers would be staff from state agencies who deal with issues such as coastal water quality and habitat management. The survey will be conducted under a cooperative agreement between the NOAA National Centers for Coastal Ocean Science (NCCOS) and HDR, Inc., an environmental consulting firm. NOAA has a long history of conducting operational modeling and forecasting, mostly in the National Weather Service

for weather and climate and the National Ocean Service for tides and currents. Expanding this capacity to include forecasting of ecological trends and conditions can be critical to many coastal management applications. This survey will help to assess coastal managers' needs for ecological forecasts and scenarios, and how such forecasts may be used in management contexts.

II. Method of Collection

Coastal managers will be emailed a link to an internet survey. The survey will be a one-time needs assessment, and will not be repeated on a regular basis.
