SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process, which started through a notice in the **Federal Register** on July 30, 2013 (78 FR 18231). For more about the refuges and our CCP process, please see that notice.

The refuges are located in Central Mississippi. They are two of seven refuges in the Theodore Roosevelt NWR Complex. The two refuges were established for conservation purposes. The enacting legislation for both refuges is section 145 of Public Law 108-199, the Consolidated Appropriations Act of 2004. This Act renamed The Bogue Phalia Unit of Yazoo NWR as Holt Collier NWR. This is the first NWR to be named in honor of an African American historical legend and famed hunting guide to President Roosevelt. Legislative authority for Holt Collier NWR therefore also comes from the Fish and Wildlife Coordination Act, which established Yazoo NWR.

Holt Collier NWR consists of approximately 2,233 acres of Farm Service Agency lands in Washington County, and it is located 5 miles east of Hollandale in the Darlove area. Its approved acquisition boundary is 18,000 acres. The refuge is open year-round for wildlife-related activities such as hunting, wildlife observation, and nature photography. The refuge habitat is former agricultural lands, most of

which, in the past 15 years, have been reforested to bottomland hardwood.

Theodore Roosevelt NWR is located in Sharkey County south of Cary, Mississippi. Congress authorized 6,600 acres to be acquired through donation and land exchange. To date 1,674 acres have been established in fee title. The habitat consists mainly of converted, agricultural lands now reforested to trees more indicative of the native bottomland hardwood forest. Farmlands and open water also occur. The refuge is not open to the public. There are no public facilities located on either refuge.

Background

The CCP Process

The National Wildlife Refuge (NWR) System Improvement Act of 1997 (Improvement Act) requires us to develop a CCP for each national wildlife refuge. CCPs are developed to provide refuge managers with a 15-year plan for achieving refuges' purposes and contributing toward the mission of the NWR System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. CCPs describe a broad management direction for conserving wildlife and their habitats. They propose wildlife-dependent recreational opportunities to be made available to the public. These include opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review the CCP annually and revise it as needed in accordance with the Improvement Act.

Priority resource issues addressed in the Draft CCP/EA include: Fish and Wildlife Populations, Habitat Management, Resource Protection, Visitor Services, and Refuge Administration. See Chapter III in the Draft CCP for a full description.

CCP Alternatives, Including Our Proposed Alternative (B)

We developed three alternatives for managing the refuge (Alternatives A, B, and C), with Alternative B as our proposed alternative. A full description of each alternative is in the CCP (Chapter IV) and Chapters III and IV of the EA. We summarize each alternative below.

Alternative A: Current Management (No Action)

Alternative A continues the refuges' limited management activities and programs at levels similar to the current and past few years of management. Theodore Roosevelt NWR would remain
