## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Amendment Under the Clean Water Act

On June 6, 2025, the Department of Justice lodged a proposed Consent Decree Amendment with the United States District Court for the Northern District of Ohio in the lawsuit entitled *United States et al. v. City of Youngstown, Ohio*, Case No. 4:98–CV–2438.

The proposed Amendment modifies the Clean Water Act Consent Decree originally entered in this case in 2002, including the Long-Term Control Plan (“LTCP”) developed by the City and approved by U.S. EPA and the State of Ohio in 2015. The Consent Decree and

LTCP resolved violations of the Clean Water Act (“CWA”) related to ongoing releases of sewage and stormwater from the City of Youngstown’s combined sewer system. This Amendment modifies the Consent Decree and LTCP by: (1) replacing the LTCP requirement to complete the “Wet Weather Facility Project” with the requirement to complete the “CSO 6057 Control Measure Project,” which is a proposed 80 million gallon per day (“MGD”) high-rate treatment facility adopting cloth-disk filter media technology for high-rate treatment of wet weather flows; and (2) replacing Chapter 5 of the LTCP with a superseding Chapter 5, including a Revised Implementation Schedule. The Revised Implementation Schedule requires Youngstown to complete the “West-Division Interceptor Sewer Replacement” to reduce combined sewer overflows. It also modifies the implementation schedule for Phase 1 of the LTCP by, among other things, establishing deadlines for the CSO 6057 Control Measure Project, compressing and accelerating the schedule for the “Mill Creek Project,” and moving up deadlines for completing the reports for submitting potential projects to be considered as part of the LTCP’s Phase 2.

The publication of this notice opens a period for public comment on the proposed Consent Decree Amendment. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States et al. v. City of Youngstown, Ohio*, D.J. Ref. No. 90–5–1–1–4383. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

**SUPPLEMENTARY INFORMATION:** NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to the points of contact in the **FOR FURTHER INFORMATION CONTACT** section.

*Title of Collection:* Grantee Reporting Requirements for the Research Experiences for Undergraduates (REU) Program.

*OMB Approval Number:* 3145-0224.

### Overview of Information Collection

NSF's Research Experiences for Undergraduates (REU) program funds REU Site grants and REU Supplements to organizations to provide authentic research experiences and related training for postsecondary students in STEM fields.

All NSF Principal Investigators in all programs are required to submit annual and final project reports through the NSF Project Reports System in *Research.gov*. The REU Program Module is a component of the NSF Project Reports System that is designed to gather basic information about the pool

of student applicants and participants in REU Site and REU Supplement projects. The information allows NSF to assess the demand and allocate resources for REU student positions within each discipline, to analyze the types of academic institutions and the educational levels represented by the participants, and to identify the participants for inclusion in periodic program evaluations.

NSF is committed to providing stakeholders with information regarding the expenditure of taxpayer funds on its investments in human capital, including activities such as REU Sites and REU Supplements. If NSF could not collect information about the students who participate in undergraduate research experiences, NSF would have no other means to consistently document the number and diversity of the participants or to identify the participants for inclusion in efforts that gauge the quality of programmatic activities and the long-term effects of the activities on the students. Without the REU Program Module, NSF also would not have information about the competitiveness of the REU opportunities, which informs the management of the program's budget.

### Consultation With Other Agencies and the Public

This information collection is specific to a subset of NSF grantees. NSF has not consulted with other agencies but has gathered information from its grantee community through attendance at PI conferences. A request for public comments will be solicited through announcement of data collection in the **Federal Register**.

### Background

All NSF Principal Investigators are required to use the project reporting functionality in *Research.gov* to report on progress, accomplishments, participants, and activities annually and at the conclusion of their project. Information from annual and final reports provides yearly updates on project inputs, activities, and outcomes for use by NSF program officers in monitoring projects and for agency reporting purposes.

If project participants include undergraduate students supported by a Research Experiences for Undergraduates (REU) Sites grant or by an REU Supplement, then the Principal Investigator is required to complete the REU Program Module in addition to the questions in NSF's standard report template.

*Respondents:* Individuals (Principal Investigators).
