SUPPLEMENTARY INFORMATION: 5 CFR 1320.12(a) requires that we provide a 60-day notice in the **Federal Register** concerning a collection of information to solicit comments on:

(a) Whether the collection of information is necessary for the proper functioning of the agency, including whether the information will have practical utility;

(b) The accuracy of our estimates of the information collection burden, including the validity of the methodology and assumptions we use;

(c) Ways to enhance the quality, utility, and clarity of the information collected; and

(d) Ways to minimize the information collection burden on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Under the General Mining Law (30 U.S.C. 29, 30, and 39), we grant the opportunity to obtain legal title (patent) to the land of those who explore for and locate valuable mineral deposits on the public domain lands. BLM implements the patent process under regulations 43 CFR 3860. Under 43 CFR 3870, any rival claimant with overlapping claims to the land applied for or anyone challenging BLM to issue the patent based on failure to follow the law or regulations must file with BLM certain required statements and evidence supporting the challenge or we will statutorily dismiss the challenge. The implementing

regulations require a patent applicant to provide the following information:

(1) Mineral survey application. Under 43 CFR Subpart 3861, the holder of a claim must submit to BLM a mineral survey for all lode claims, most mill sites, and placer claims located upon surveyed public lands, as a requisite to apply for a patent. BLM uses Form 3860-5 to collect the mining claim or site recording, chain-of-title, and geographic location information so that we can authorize a Deputy U.S. Mineral Surveyor to survey the claims or sites.

(2) Mineral patent application. Under 43 CFR 3862, 3863, and 3864, a mineral patent applicant must file certain proofs of ownership to demonstrate clear title to the claim(s) or millsite(s), bonafide of development, and the existence of a commercial mineral deposit subject to the General Mining Law of 1872, as amended. BLM used Form 3860-2 for title verification until Congress implemented a moratorium on new mineral patent applications.

Based on BLM's experience administering the General Mining Law, we estimate the public reporting burden to complete Form 3860-5 is one hour and for adverse claims or protests it is two hours. BLM estimates that we receive 30 mineral survey applications and 10 protests annually, with a total annual burden of 50 hours. The respondents are owners of unpatented mining claims and mill sites upon the public lands, reserved mineral lands of the United States, National Forests, and National Parks. The frequency of response is once for each mineral survey, each application for patent, and each filing of a protest or adverse claim. Since October 1, 1994, Congress has passed an annual moratorium which prevents the BLM for processing mineral patent applications unless the applications were grandfathered under the initial legislation. This moratorium does not affect mineral surveys, contests, or protests to existing mineral patent applications.

Any member of the public may request and obtain, without charge, a copy of BLM Form 3860-5 by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

BLM will summarize all responses to this notice and include them in the request for OMB approval. All comments will become a matter of a public record.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Proposed Classification of Public Lands for State Indemnity Selection.

SUMMARY: The Arizona State Board of Land Commissioners has filed a petition for classification and application to acquire the public lands, including the mineral estate, as applicable, described in paragraph 5 below, under the provisions of sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852), in lieu of certain school lands granted to the State under the enabling act of June 20, 1910 (36 Stat. 557, 572-575), that were encumbered by other rights or reservations before the State's title could attach. This application has been assigned Serial Number AZA-32028.

SUPPLEMENTARY INFORMATION:

1. The Bureau of Land Management will examine these lands for evidence of prior valid rights or other statutory constraints that would bar transfer. This proposed classification is pursuant to Title 43, Code of Federal Regulations, subpart 2400; and section 7 of the Act of June 28, 1934. (48 Stat. 1269).

2. Information concerning these lands and the proposed transfer to the State of Arizona may be obtained from the Bureau of Land Management, Arizona State Office.

3. For a period of 60 days from the date of publication of this notice in the **Federal Register**, all persons who wish to submit comments, suggestions, or objections in connection with the proposed classification may present their views in writing to the State Director, Bureau of Land Management, Arizona State Office, 222 North Central Avenue, Phoenix, Arizona 85004.

Any adverse comments will be evaluated by the State Director who will issue a notice of determination to proceed with, modify, or cancel the action. In the absence of any action by the State Director, this classification action will become the final determination of the Department of the Interior.

As provided by Title 43 Code of Federal Regulations, Subpart 2462.1(b), a public hearing may be scheduled by the State Director if he determines that sufficient public interest exists to

warrant the time and expense of a hearing.
