Title: Secondary Non-Ferrous Metals Processing Area Source Standard Development Questionnaire.

Abstract: The proposed ICR will collect information and data from 110 existing secondary non-ferrous metal processing plants. Plants will be required to complete a simple paper

questionnaire on production processes and equipment, air pollution control systems, pollution prevention management practices, applicable regulatory requirements, and emissions test data. The questionnaire may be completed from existing information; no additional monitoring or testing is required. The EPA will use the collected information and data to develop area source standards for hazardous air pollutants required under section 112(d) of the Clean Air Act.

EPA's authority to collect information is contained in section 114 of the Clean Air Act, (42 U.S.C 7414). All information submitted to EPA pursuant to this ICR for which a claim of confidentiality is made is safeguarded according to Agency policies in 40 CFR part 2, subpart B.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 62 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are secondary non-ferrous metals processing establishments, excluding plants that perform secondary processing of aluminum, copper, or lead. The standard industrial classification (SIC) code for this industry is primarily 3341, Secondary Smelting and Refining of Non-ferrous Metals; the North American Industry Classification System (NAICS) code is 331492, Secondary Smelting, Refining, and Alloying of Non-ferrous Metal (Except Copper and Aluminum).

Estimated Number of Respondents: The estimated number of respondents is 110.

Frequency of Response: This is a new collection requiring a one-time response.

Estimated Total Annual Hour Burden: The estimated total annual hour burden is 2,281 person-hours.

Estimated Total Annual Cost: \$179,456, which includes \$0 annualized capital/startup costs, \$0 annual O&M costs, and \$179,456 annual labor costs.
