

on climate than release of that methane unburned.

2. Processing for Pipeline Quality Gas—Methane is the principal component of natural gas, which is used for heating and industrial purposes. WMM may be contaminated with air (or other materials) to various degrees when it is released and collected. Contaminants may need to be removed from the methane before it can be sold as natural gas. A general reference concerning the upgrade of WMM to pipeline-quality gas is available from the EPA at <http://www.epa.gov/cmop/docs/red24.pdf>.

3. Other Mine Methane End Uses—New technologies and innovative use of existing technologies are always evolving. The BLM is also interested in receiving comments regarding other potential WMM reduction methods or technologies that could be applicable to its mineral leasing programs.

Please send or deliver comments to one of the addresses listed under **ADDRESSES**. Please refer to RIN 1004–AE23 in your correspondence.

Tommy P. Beaudreau,

Principal Deputy Assistant Secretary, Land and Minerals Management.

[FR Doc. 2014–09688 Filed 4–24–14; 11:15 am]

BILLING CODE 4310–84–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2014–0002; Internal Agency Docket No. FEMA–B–1021]

Proposed Flood Elevation Determinations for Dona Ana County, New Mexico and Incorporated Areas

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Federal Emergency Management Agency (FEMA) is withdrawing its proposed rule concerning proposed flood elevation determinations for Dona Ana County, New Mexico and Incorporated Areas.

DATES: This withdrawal is effective on April 29, 2014.

ADDRESSES: You may submit comments, identified by Docket No. FEMA–B–1021, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW.,

Washington, DC 20472, (202) 646–4064, or (email)

Luis.Rodriguez3@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: On November 24, 2008, FEMA published a proposed rulemaking at 73 FR 70948, proposing flood elevation determinations along one or more flooding sources in Dona Ana County, New Mexico. Because FEMA has or will be issuing a Revised Preliminary Flood Insurance Rate Map, and if necessary a Flood Insurance Study report, featuring updated flood hazard information, the proposed rulemaking is being withdrawn. A Notice of Proposed Flood Hazard Determinations will be published in the **Federal Register** and in the affected community's local newspaper.

Authority: 42 U.S.C. 4104; 44 CFR 67.4.

Dated: April 14, 2014.

Roy E. Wright,

Deputy Associate Administrator for Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On January 16, 2008, the Federal Emergency Management Agency (FEMA) published in the **Federal Register** a proposed rule that included modified Base (1% annual-chance) Flood Elevations (BFEs) for the locations at the intersection with IH 440 and at the confluence with Palarm Creek along the Arkansas River in Pulaski County, Arkansas. FEMA is no longer proposing these flood elevation determination changes along the
