

(called Recommendations) and other OIML publications for comment. NIST also leads U.S. delegations to OIML Technical Meetings.

Additional Information

All parties with an interest in the work of the OIML are requested to review and submit comments on any or all of the 24 Recommendations and Documents that will be presented for ratification by the Conference. All submitted comments will be reviewed and considered by NIST staff in the development of U.S. positions that will be put forward at the 14th Conference of OIML. Within two weeks of the comment submission deadline established in the **DATES** section above, all parties that submit comments will be provided with feedback from NIST staff concerning the disposition of their comments.

Each of the 24 Recommendations and Documents that will be presented for ratification by the Conference has already gone through a multi-year development and review-process involving technical experts and legal metrology experts from the United States and around the world. Ratification by the Conference is the final step in this process. The Recommendations and Documents have been divided into two categories—Category 1: those already approved by the International Committee of Legal Metrology (CML) between 2009 and 2011, and Category 2: those that are expected to be submitted directly to the Conference for ratification. Because the Recommendations and Documents in Category 2 have not yet received CML approval, comments received on these Recommendations and Documents are of additional importance to NIST staff. The 24 Recommendations and Documents and the OIML-member nations holding the secretariat responsible for their development are listed below:

Category 1

- R14, “Polarimetric saccharimeters graduated in accordance with the ICUMSA International Sugar Scale” (Russian Federation);
- R35, “Material Measures of Length for General Use” (United Kingdom);

- Parties with an expressed interest in particular topics may obtain copies of the OIML Conference technical agenda, including copies of the Recommendations to be ratified, from the OIML International Conference Web site at <http://bucharest.oiml.org>, at the OIML Web site at www.oiml.org, or from the NIST International Legal Metrology Program.

Georgia Aquarium requests authorization to import 18 wild caught beluga whales from the Utrish Marine Mammal Research Station in Russia to the United States for the purpose of public display. All 18 beluga whales were collected in Sakhalin Bay of the Sea of Okhotsk in 2006, 2010, and 2011. Approximately six (6) animals would be transported to the Georgia Aquarium facility in Atlanta, GA, and the remaining animals would be transported to four other U.S. partner facilities; Sea World of Florida, Sea World of Texas, Sea World of California, and Shedd Aquarium pursuant to breeding loans. Georgia Aquarium and its U.S. partners are: (1) Open to the public on regularly scheduled basis with access that is not limited or restricted other than by charging for an admission fee; (2) offer conservation and educational programs

In addition to determining whether the applicant meets the three public display criteria, NMFS must determine whether the applicant has demonstrated that the proposed activity is humane and does not represent any unnecessary risks to the health and welfare of marine mammals; that the proposed activity by itself, or in combination with other activities, will not likely have a significant adverse impact on the species or stock; and that the applicant's expertise, facilities and resources are adequate to accomplish successfully the objectives and activities stated in the application.

A draft environmental assessment (EA) has been prepared in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), to examine whether significant environmental impacts could result from issuance of the proposed permit. The draft EA is available for review and comment simultaneous with the permit application.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
