

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2012-0263]

Agency Information Collection Activities: Proposed Collection; Comment Request**AGENCY:** Nuclear Regulatory Commission.**ACTION:** Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* NRC Form 664, General Licensee Registration.
2. *Current OMB approval number:* 3150-0198.
3. *How often the collection is required:* Annually.
4. *Who is required or asked to report:* General Licensees of the NRC who possess certain generally licensed devices subject to annual registration authorized pursuant to § 31.5 of the *Code of Federal Regulations* (10 CFR).
5. *The number of annual respondents:* 633.
6. *The number of hours needed annually to complete the requirement or request:* 211 hours.

7. *Abstract:* NRC Form 664 is used by NRC general licensees to make reports regarding certain generally licensed devices subject to annual registration. The registration program allows NRC to better track general licensees, so that they can be contacted or inspected as necessary, and to make sure that generally licensed devices can be identified even if lost or damaged. Also, the registration program ensures that general licensees are aware of and understand the requirements for the possession, use and disposal of devices containing byproduct material. Greater awareness helps to ensure that general licensees will comply with the regulatory requirements for proper handling and disposal of generally licensed devices and would reduce the potential for incidents that could result in unnecessary radiation exposure to the public and contamination of property.

Submit, by January 22, 2013, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
