

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Request for Contractor Access to Toxic Substances Control Act Confidential Business Information (CBI) (EPA ICR Number 1250.12; OMB Control Number 2070-0075) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR which is currently approved through October 31, 2022. Public comments were previously requested via the **Federal Register** on January 24, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before November 28, 2022.

ADDRESSES: Submit your comments to EPA, referencing Docket ID No. EPA-HQ-OPPT-2017-0318, online using www.regulations.gov (our preferred method), by email to https://www.epa.gov/dockets, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Abstract: EPA procures contract support to facilitate the performance of certain duties. EPA may require contractors to handle TSCA CBI. Each contractor employee who will use TSCA CBI in the performance of his or her duties must be authorized for access to TSCA CBI through a multi-step process. The TSCA CBI Protection Manual provides Federal and contractor employees with guidelines and operating procedures for handling TSCA CBI while performing their official duties, as well as the procedures to obtain authorization for access to TSCA CBI.

Specifically, for purposes of this information collection, contractor personnel must submit to EPA the EPA form titled "TSCA CBI Access Request, Agreement, and Approval" (EPA Form 7740-6). The Agency uses EPA Form 7740-6 to collect information about contractor personnel so that the Agency can evaluate their suitability for access to TSCA CBI.

Form Numbers: 7740-6.

Respondents/affected entities:

Potentially affected entities may include but are not limited to the following: NAICS codes 514 (Information Services) and 561 (Administrative and Support Services).

Respondent's obligation to respond: Mandatory, 15 U.S.C. 2613.

Estimated number of respondents: 241 (total).

Frequency of response: On occasion.

Total estimated burden: 341 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$19,740 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: The estimated annual burden to contractors is unchanged at 341 hours compared with that identified in the ICR currently approved by OMB. Also, the costs to the industry respondents increased by \$435,

reflecting increases in labor and overhead costs over time.

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Engine Test Cells/Stands (40 CFR part 63, subpart PPPPP) apply to any existing, new, or reconstructed engine test cells/stands located at major source facilities that are used for testing internal combustion engines. Owners and operators of engine test cells/stands are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as the applicable specific standards in 40 CFR part 63 Subpart PPPPP. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart PPPPP and must be maintained for at least 5 years from the date on which it was generated.

Form Numbers: 5900-523.

Respondents/affected entities: Engine test cells/stands.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart PPPPP).

Estimated number of respondents: 8 (total).

Frequency of response: Semiannually.

Total estimated burden: 830 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$101,000 (per year), which includes \$2,400 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is a decrease in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. The regulations were previously amended in a Risk and Technology Review (RTR) on June 3, 2020 at 85 FR 34326. The change in the burden and cost estimates in this ICR occurred because the revised standard has been in effect for 1.5 years and the requirements are different during initial compliance (new facilities) as compared to on-going compliance (existing facilities). The previous ICR (2066.09) reflected those burdens and costs associated with the initial activities for those facilities subject to the June 3, 2020 final rule. This ICR (2066.10) reflects the ongoing burden and costs for existing facilities. The final rule amendments eliminated the SSM exemption, removed the SSM plan and SSM recordkeeping requirements, and required electronic submittal of performance test results. This ICR adjusts the burden, following the June 3, 2020 final rule, to reflect the current number of entities anticipated to be subject to the rule, and assumes the one new source identified in the RTR has already complied with the initial notification and testing requirements, resulting in a decrease in the capital/startup costs. This ICR retains the assumption in the final rule ICR that two new sources will submit an initial notification over the next three years, but will not be subject to emission limits, performance testing, recordkeeping, and reporting requirements. No new sources that would be subject to the emission limits, performance testing, recordkeeping and reporting requirements are anticipated during the three-year period of this ICR.
