Rather, they contain additional guidance and clarification on compliance with 10 CFR 50.34(h) and 10 CFR 52.79(a)(41), and may be used by operating license and COL applicants, respectively, in the preparation of their applications. As explained in the applicability section of each ISG, the ISGs do not apply to holders of nuclear power reactor operating licenses under 10 CFR Part 50 or combined licenses under 10 CFR Part 52 as of the effective date of these ISGs and, for ISG-014, the effective date of revision of SRP Section 2.4.13, and for applicants for nuclear power reactor operating licenses under 10 CFR Part 50 or combined licenses under 10 CFR Part 52 that have committed, in applications docketed with the NRC as of the effective date of this ISG and, for ISG-014, the effective date of revision of SRP Section 2.4.13, to specific guidance in assessing the radiological consequences of a postulated failure of a tank containing radioactive materials.

Congressional Review Act

Each of these ISGs is a rule as designated in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found either one to be a major rule as designated in the Congressional Review Act.
