

inoperative. These notifications, reports, and records are essential in determining compliance and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Ferroalloys production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXX).

Estimated number of respondents: 2 (total).

Frequency of response: Initially, quarterly, semiannually, and annually.

Total estimated burden: 1,610 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$645,000 (per year), which includes \$424,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Director, Information Engagement Division.
