SUPPLEMENTARY INFORMATION:

OMB Control No: 3060-0599.

Title: Sections 90.425 and 90.647, Station Identification.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 209 respondents; 209 responses.

Estimated Time Per Response: 1.66 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. sections 154(i), 309(j) and 332.

Total Annual Burden: 347 hours.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: No questions of a confidential nature are asked or required.

Need and Uses: The Commission is requesting an extension (no change in the reporting requirement) in order to obtain the full three year clearance from the Office of Management and Budget (OMB). The Commission has increased

the estimated burden hours by 272 hours which is due to 164 additional respondents since this information collection (IC) was last submitted to OMB in 2007.

In a November 1994 Third Report and Order, the Commission streamlined and conformed its rules concerning the transmission of station identification information by Commercial Mobile Radio Service (CMRS) licensees. The Commission concluded that CMRS licensees operating on an exclusive basis in Commission-defined service areas should generally not be required to transmit station identification. In the case of all other CMRS licensees, however, whether licensed exclusively on a site-specific basis or licensed on shared channels, the Commission continued to require transmission of station identification information on a regular basis in accordance with the standards set forth in Commission rules.

On reconsideration in April 2000, the Commission in addition to resolving various petitions, clarified that Part 90 licensees need only transmit station identification once an hour as specified in 47 CFR 90.425(e). Consistent with that change, the Commission also amended Section 90.647 to clarify that CMRS providers operating trunked systems are also subject only to the streamlined requirements of Section 90.425(e).

Because digital call sign transmission greatly reduces the burden of the call sign requirements for CMRS systems providing digital service, the Commission also permits all CMRS licensees on exclusive channels to transmit call signs digitally. To use a digital call sign, however, the licensee must provide the Commission with information sufficient to decode the digital transmission and ascertain the call sign transmitted.
