*Needs and Uses:* Part 61 is designed to ensure that all tariffs filed by common carriers are formally sound, well organized, and provide the Commission and the public with sufficient information to determine the justness and reasonableness as required by the Act, of the rates, terms and conditions in those tariffs. In the Seventh Report and Order in CC Docket No. 96-262 released on April 27, 2001, the Commission had limited the application of its' tariff rules to interstate access services provided by nondominant local exchange carriers. The Commission is requesting an extension (no change) to this information collection in order to obtain the full three year clearance from the OMB. The Commission is reducing the number of burden hours and costs to the respondents for this information collection due to less carriers filing this information with the Commission.

*Needs and Uses:* The Commission has a program to monitor the impacts of the universal service support mechanisms. The program requires periodic reporting by telephone companies and the universal service administrator. The information is used by the Commission, Federal-State Joint Boards, Congress and the general public to assess the impacts of the decisions of the Commission and

the Joint Boards. Prior to 2002, the Commission required the following data to be collected: local, intrastate toll, and interstate dial equipment minutes, interstate dial equipment minute factors, and interstate access minutes. After the necessary 60 day public comment period, the Commission plans to submit this revised collection to OMB, because the dial equipment minutes reporting categories were eliminated due to separations reforms (see FCC 01-162). Thus, only the interstate access minutes remain to be reported.

*Total Annual Cost:* \$480,000.

*Privacy Act Impact Assessment:* Not Applicable.

*Needs and Uses:* In the Memorandum Opinion and Order issued in CC Docket No. 96-128, the Wireline Competition Bureau of the Federal Communications Commission clarified requirements established in the Payphone Orders for the provision of payphone-specific coding digits by Local Exchange Carriers and Payphone Service Providers (PSPs), to Interexchange Carriers (IXCs), beginning on October 7, 1977. Specifically, the Order clarified that only Flexible Automatic Numbering Identification (FLEX ANI) complies with the requirements; requires that LECs file tariffs to reflect FLEX ANI as a non-chargeable option to IXCs; requires that LECs file tariffs to recover costs associated with implementing FLEX ANI; and grants permission and certain waivers. The Commission is seeking extension (no change) to this information collection and the respondents, burden hours and burden costs remain unchanged.
