

2. What are the challenges and obstacles for these schools to adopt curriculum over the course of their training?

3. Do the current graduates of these training programs feel they have the confidence, skills, experience and training to effectively provide optimal care?

4. What is the connection between clinical confidence and changes in behavior and attitudes among healthcare providers?

5. What are the estimated overall cost savings for providing optimal healthcare to people with disabilities?

6. What are the transferable skills that clinicians can learn from “disability competency training” to apply to all other patient populations (especially the elderly, complex and chronic co-existing conditions, which is a growing patient population)?

7. What are the existing curriculum resources that can be adopted and incorporated into current provider training?

### III. ADA Accommodations during Court Proceedings

This project will explore the lack of available training for judges and ADA coordinators that results in people with disabilities being denied reasonable accommodations in court proceedings, which often directly impacts the outcome of the litigation; and offer recommendations to address this unequal access to the courts. The following are areas comment:

1. How many states have court ADA coordinators?

2. With states that have ADA coordinators, is there an ADA grievance procedure? Is the decision to provide reasonable accommodation decided by the coordinator or the judge?

3. What are the training requirements for judges? Is training available that discusses reasonable accommodations?

4. Why does there seem to be a lack of understanding of reasonable accommodations and family courts?

5. What procedure is required to amend the Administrative Offices of the Courts Regulations?

6. What is the current procedure in federal courts to assess reasonable accommodation requests?

### IV. Youth and Younger Adults with Disabilities in Nursing Homes

This project seeks to uncover the drivers of the growing population of youth and younger adults with disabilities living in nursing homes and explore policy solutions that seek to keep youth and younger adults with disabilities in their communities where

they can live, learn, and seek employment. The following are areas comment:

1. What number of people with disabilities ages 21–40 are receiving LTSS in nursing homes? How large is the subset of those under age 21? What are the numbers by state? What are the demographics? What is the average length of stay? What placements were made out of state?

2. What data gaps exist on these questions and how could the Centers for Medicare and Medicaid Services (CMS) improve them? What reporting could HHS or HUD require of federal fund recipients to obtain data on people with disabilities age 40 and under in nursing homes?

3. How many people are estimated to be on waiting lists to transfer out of nursing facilities are ages 21–40 and under 21? What federal and state policies assist in gathering this information and what are the federal and state barriers?

4. Are there existing federal and state policies that have the effect of routing younger people with disabilities into nursing homes? (Please note that NCD is not seeking information on what keeps people with disabilities from leaving nursing facilities as we have well-established research on that topic).

5. What impact has Money Follows the Person had on nursing home diversion for younger people with disabilities? Please provide specific examples to the degree possible. What other programs are successful at diversion of younger people with disabilities from nursing homes?

6. What opportunities are available to younger people with disabilities who reside in nursing homes, for free appropriate public education (FAPE), recreation, community participation? What are the results of unavailability/restricted availability of the activities?

7. How could policymakers specifically address the needs of younger people with disabilities in LTSS and housing policy?
