DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0069]

Request for Information: Nationally Uniform 911 Data System

AGENCY: National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation (DOT).

ACTION: Notice; request for information.

SUMMARY: The development of a nationally uniform 911 data system, containing uniform data elements for all Computer Aided Dispatch (CAD) data, data associated with the operation of local and State 911 systems, and Extensible Markup Language (XML) schema (or technical equivalent) that would enable the collection, analysis and sharing of standardized administrative data, operational data, cost data and all Computer Aided Dispatch (CAD) data received, collected, processed, and transmitted during 911 calls; that would be developed and made available to all 911 Public Safety Answering Points (PSAPs) and 911 Authorities at the state and local levels. This nationally uniform 911 data system, once developed, would provide essential information to assist strategic planning, governance decisions, and improvements to the 911 system and its operation at all levels of government. These data would also be useful to private sector companies providing support services to local and state 911 agencies.

DATES: It is requested that comments on this announcement be submitted by September 28, 2016.

ADDRESSES: You may submit comments [identified by Docket No. NHTSA–2016–0069] through one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Mail or Hand Delivery:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Laurie Flaherty, National Highway Traffic Safety Administration, Office of Emergency Medical Services, (202) 366–2705, LaurieFlaherty@dot.gov, located at the United States Department of Transportation; 1200 New Jersey Avenue SE., NPD–400, Room W44–322, Washington, DC 20590. Office hours are from 9 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: DOT/NHTSA, on behalf of the National 911 Program, is seeking comments from all sources (public, private, governmental, academic, professional, associations, public interest groups, and other interested parties) on the idea of establishing a nationally uniform data system, to document PSAP 911 call data and the data related to the operation of 911 systems at all levels of government within the 911 community. A nationally uniform 911 data system was identified as a need by the Federal Communication Commission's (FCC's) Task Force on Optimal PSAP Architecture (TFOPA), in its final report, released January 29, 2016: “A National system enabling the collection and analysis of standardized administrative data, operational data, cost data and CAD data should be developed and made available to PSAPS and 911 Authorities, to provide essential information to substantiate planning decisions and improvements to assist in the migration towards NG911.” Models for a nationally uniform data system exist in other disciplines, for example, the National Fire Operations Reporting System (N–FORS), <http://911perform.org> and the National EMS Information System (NEMSIS), <http://nemsis.org>. There are elements of these existing systems, in terms of their content and the processes used for their development, implementation, and operation, that could be adopted or adapted for use by the 911 community, in developing an analogous data system.

The purpose of this notice is to solicit comments and ideas on all aspects of the development, implementation and operation of a nationally uniform 911 data system from the broad 911 stakeholder community, including CAD vendors, CAD interface developers, PSAP managers, local and State 911 authorities and agencies, national
