

I find that the circumstances which led to my previous determination that California was experiencing a shortage of electric energy continue and hereby extend the Section 202(c) emergency order until 3:00 a.m., EST December 28, 2000. In addition, I am changing the order such that the entities listed in the order are not required to deliver energy or services to the California ISO until 8 hours after the California ISO submits its certification to the entities. Further, I am deleting the first sentence of Ordering Paragraph E of the December 14, 2000, order and requiring the California ISO to request, at the time of certification from the entities from which it is seeking energy and services, information on the availability of resources subject to the order. This information must be supplied to the California ISO within 6 hours of certification.

All other terms of the December 14, 2000, order remain the same and in effect.

#### Order

For the reasons set forth above, pursuant to Section 202(c) of the Federal Power Act, it is ordered that:

G. Ordering Paragraph C of the "Order pursuant to Section 202(c) of the Federal Power Act" (the Order), dated December 14, 2000, is amended to read as follows: "This order is effective immediately and expires at 3:00 a.m., EST, December 28, 2000, unless altered or revoked by further order."

H. Ordering Paragraph D of the Order is amended by striking the number "12" and inserting in its place the number "8".

I. Ordering Paragraph E of the Order is amended by striking the first sentence thereof and inserting the following sentence: "The California ISO must seek information from entities subject to the terms of this order, from which the California ISO seeks to obtain energy and services, at the time of certification and the entities must respond within 6 hours."

Issued in Washington, D.C., on December 20, 2000.

#### **Aquamac Corporation; Merrimac Paper Company, Inc.; Notice of Availability of Final Environmental Assessment**

December 21, 2000.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the applications for new licenses for the Aquamac and Merrimac Hydroelectric Projects, located on the Merrimack River in the city of Lawrence, Essex County, Massachusetts, and has prepared a Multiple Project Environmental Assessment (MPEA) for the projects.

On October 15, 1999, the Commission staff issued and distributed to all parties a draft MPEA on the projects, and requested that comments be filed with the Commission within 30 days. Comments were filed and are addressed in the final MPEA.

This final MPEA contains the staff's analysis of the potential environmental impacts of the projects and concludes that licensing the projects, with appropriate environmental measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

Copies of the final MPEA are available for review in the Public Reference Branch, Room 2-A, of the Commission's

offices at 888 First Street, NE., Washington, DC 20426.
