

with the NSF) and the qualified institution of higher education with annual verifiable documentation of post-award employment and up-to-date contact information.

As required by 15 U.S.C. 7442, an SFS scholarship recipient is financially liable to the United States if the individual: fails to maintain an acceptable level of academic standing; is dismissed from the applicable institution of higher education for disciplinary reasons; withdraws from the eligible degree program before completing the program; declares that they do not intend to fulfill the post-award employment obligation; or fails to maintain or fulfill any of the post-graduation or post-award employment obligations or requirements. Failure to satisfy the academic requirements of the program or to complete the service requirement results in forfeiture of the scholarship award, which must either be repaid or reverted by the institution to a student loan pro-rated accordingly to reflect partial service completed.

Approval of the SFS Registration system is necessary to continue management and operation of the program in accordance with the Cybersecurity Enhancement Act of 2014 (Pub. L.: 113–274), as amended by the National Defense Authorization Act and CHIPS and Science Act of 2022 (15 U.S.C. 7442), and to facilitate the timely registration, selection, placement, and monitoring of program-enrolled scholarship recipients in Government agencies.

The burden estimate associated with this request is increasing from past years. This is due to three primary reasons: an increased number of scholars, increased reporting requirements, and reassessment of previous reporting of burden estimates. Each year NSF awards grants to additional universities to use for scholarships under the SFS program which increases the number of students that receive scholarships, and consequently, the number of scholars that need to be monitored through the completion of their service commitment. Each student awarded a scholarship must register their profile and resume with the SFS website for the successful facilitation of their placement with a government agency, and they must maintain up-to-date profile and employment information through program completion. The annual employment verification and profile maintenance was not previously collected, and to meet this requirement, scholars and their affiliated academic officials must report employment and up-to-date profile information. Finally,

the previous data collection requests only included new scholars registering with the SFS portal. Costs attributable to the requirement for scholars to provide annual employment verification and to maintain an up-to-date profile have been captured in this burden estimate in addition to the information collected from academic and agency officials.

OPM is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Ways in which we can minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
