Total Annual Burden: 2,100 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission will use the information collected under this information collection to determine whether applicants are qualified to participate in a 5G Fund auction.

In its November 2011 *USF/ICC Transformation Order*, the Commission took numerous steps to comprehensively reform and modernize the universal service program to ensure that robust, affordable fixed and mobile voice and broadband service are available to those in rural, insular, and high cost areas of the country. *Connect America Fund et al.*, Order and Further Notice of Proposed Rulemaking, FCC 11–161 (*USF/ICC Transformation Order*). Among other things, the Commission (1) established a two-phased Mobility Fund to award universal service support for mobile services in a cost-effective manner to no more than one provider per area in areas where a private-sector business case was lacking, (2) directed that universal service support under the Mobility Fund be awarded by competitive bidding, (3) adopted the rules and framework for Mobility Fund Phase I, and (4) sought comment on the rules and proposed framework for Mobility Fund Phase II. In its February 2017 *Mobility Fund Phase II Report and Order*, the Commission adopted the rules and framework for Mobility Fund Phase II to provide ongoing universal service support over a ten-year term to areas of the country unlikely to receive 4G LTE service absent subsidies, along with the framework for a challenge process to resolve disputes about areas that were found to be presumptively ineligible for support. *Connect America Fund; Universal Service Reform—Mobility Fund II*, Report and Order and Further Notice of Proposed Rulemaking, FCC 17–11. However, in its October 2020 *5G Fund Report and Order*, the Commission established the 5G Fund as a replacement for Mobility Fund Phase II, and adopted the framework and rules

for the 5G Fund to award universal service support in two phases through separate reverse auctions to ensure the deployment of high-speed, 5G mobile service in areas unlikely to see such service absent subsidies. *Establishing a 5G Fund for Rural America*, Report and Order, FCC 20–150 (*5G Fund Report and Order*). In the *5G Fund Report and Order*, the Commission, among other things, adopted a two-stage application process for 5G Fund auctions consisting of pre-auction requirements for applicants seeking to participate in a 5G Fund auction and post-auction requirements for winning bidders applying for 5G Fund support. The Commission decided that applicants seeking to participate in a 5G Fund auction would be required to provide both the information required by section 1.21001(b) of the Commission's existing Part 1, Subpart AA universal service competitive bidding rules, 47 CFR 1.21001(b), and the additional application disclosures and certifications specific to the 5G Fund required by section 54.1014(a) of the Commission's rules, 47 CFR 54.1014(a).

Under this new information collection, the Commission will collect the information, disclosures, and certifications required by sections 1.21001(b) and 54.1014(a) of the Commission's rules from each applicant seeking to participate in a 5G Fund auction, and will use the information, disclosures, and certifications to determine whether an applicant is legally, technically, and financially qualified to participate in a 5G Fund auction. To aid in collecting this information, the Commission has created FCC Form 184, which will be used to provide the information, disclosures, and certifications required by sections 1.21001(b) and 54.1014(a). Commission staff will review the information, disclosures, and certifications collected on FCC Form 184 as part of the pre-auction process, prior to the start of the auction, and determine whether each applicant satisfies the Commission's requirements to participate in an auction for 5G Fund support. Without the information collected on FCC Form 184, the Commission will not be able to determine if an applicant is legally qualified to participate in a 5G Fund auction and has complied with the various applicable regulatory and statutory auction requirements for such participation. This approach provides an appropriate screen to ensure serious participation without being unduly burdensome.

Federal Communications Commission.
