Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank

indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 18, 2002.

[Program Announcement 02003]

Community-Based Participatory Prevention Research; Notice of Availability of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2002 funds for a grant program for the Office

of Extramural Prevention Research. This program addresses the "Healthy People 2010" focus area, Educational and Community-Based Programs. It is also related to the Department of Health and Human Services Strategic Plan Goal 6: "Strengthen the nation's health sciences research enterprise and enhance its productivity through the Prevention Research Initiative."

The purpose of the program is to stimulate investigator-initiated participatory research on community-based approaches to prevention. Findings from these projects should advance the practice of public health and policy in order to promote health and reduce disease, disability, and injury. Specifically, this announcement seeks to support multi-disciplinary, multi-level, participatory research that will enhance the capacity of communities and population groups to address health promotion and the prevention of disease, disability and injury.

Multi-level research involves interventions directed at two or more levels, such as individual, family, neighborhood, organizational, broader community (e.g., city, county, state), environmental and/or policy or legislative levels. Community refers to populations that may be defined by geography, race, ethnicity, gender, sexual orientation, or disability or other health conditions, or to groups that have a common interest or cause, such as health or service agencies and organizations, practitioners, policy makers, or lay public groups with public health concerns.

Participatory research involves collaboration with the community being studied, at least in formulating the research questions and in interpreting and applying research findings, and, if the community so chooses, in selecting methods and analyzing data. This announcement is not limited to any particular model of participatory research.

While the direction of the research must be guided by the expressed needs and interests of the community engaged in the study, this program is especially targeted to supporting cross-cutting research (i.e., research that considers interventions or methods that would now or in the future be applicable to more than one health condition).

B. Eligible Applicants

Applications may be submitted by public and private nonprofit organizations and by governments and their agencies; that is, universities, colleges, research institutions, hospitals, other public and private nonprofit
