SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), which amended the National Wildlife Refuge System Administration Act of 1966, requires us to develop a CCP for each national wildlife refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, environmental education and interpretation.

We initiated the CCP/EA for the Ellicott Slough National Wildlife Refuge in July 2008. At that time and throughout the process, we requested,

considered, and incorporated public scoping comments in numerous ways. Our public outreach has included a **Federal Register** notice of intent published on July 14, 2008 (73 FR 40360), a planning update, and a CCP webpage (<http://www.fws.gov/cno/refuges/ellicott/index.cfm>). We received two scoping comments during the 30-day public comment period.

Background

Ellicott Slough National Wildlife Refuge was established in 1975 under the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) and the Emergency Wetlands Resources Act of 1986 (16 U.S.C. 3901–3932). The nearly 300-acre Ellicott Slough National Wildlife Refuge, located in Santa Cruz County, California, consists of three noncontiguous units within and adjacent to Ellicott Slough and associated watersheds. The Refuge was established to protect the endangered Santa Cruz long-toed salamander by supporting 2 of the 20 known breeding populations of the salamander. Due to the sensitivity of the habitat, the Refuge is currently closed to the public. Through this CCP process, we will determine whether any wildlife-dependent recreational opportunities should be made available to the public.

Alternatives

The Draft CCP/EA identifies and evaluates three alternatives for managing Ellicott Slough National Wildlife Refuge for the next 15 years. The alternative that appears to best meet the Refuge purposes is identified as the preferred alternative. The preferred alternative is identified based on the analysis presented in the Draft CCP/EA, which may be modified following the completion of the public comment period based on comments received from other agencies, Tribal governments, nongovernmental organizations, or individuals.

Under Alternative A, the no action alternative, we would continue to manage the Refuge as we have in the recent past. No major changes in habitat management would occur. The Refuge would remain closed to the public.

With Alternative B (preferred alternative), the Service would standardize the monitoring and surveying program for species, construct and improve breeding and ephemeral pond habitat, identify buffer and corridor habitat for boundary expansion and acquisition, develop weed management and prevention/early detection plans, assess contaminants and disease, conduct climate change modeling, identify additional breeding
