SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a director's decision with regard to a petition dated July 25, 2013, as supplemented on November 13, 2013, filed by Mr. David Lochbaum, (the petitioner), on behalf of Alliance for Green Economy, Beyond Nuclear, Citizens Awareness Network, and Union of Concerned Scientists, requesting that the NRC take action with regard to concerns with the operation of James A. FitzPatrick Nuclear Power Plant (FitzPatrick), owned by Entergy Nuclear Generation Company and operated by Entergy Nuclear Operations, Inc. (Entergy, the licensee). The petitioner's requests and the director's decision are included in the **SUPPLEMENTARY INFORMATION** section of this document.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a director's decision (ADAMS Accession No. ML14247A306) on a petition filed by the petitioner on July 25, 2013, (ADAMS Accession No. ML13217A061). The petition was supplemented by letter dated November 13, 2013 (ADAMS Accession No. ML13347B133). The petitioner requested that the NRC take enforcement action by imposing a regulatory requirement that all the condenser tubes be replaced at FitzPatrick prior to the reactor restarting from its fall 2014 refueling outage.

On November 13, 2013, the petitioner and the licensee met with the NRC's Petition Review Board. The meeting provided the petitioner and the licensee an opportunity to provide additional information and to clarify issues cited in the petition. The transcript for that meeting is available in ADAMS under Accession No. ML14036A234.

As a basis of the request, the petitioners asserted that FitzPatrick is experiencing abnormally high occurrences of condenser tube failures. To repair these leaks, Entergy Nuclear Operations Inc. (Entergy) routinely reduces power, makes the repairs needed, and returns to full power. The petitioners state that these power excursions constitute a risk to public health and safety. The NRC's Reactor Oversight Process also recognizes the elevated risk associated with unplanned power changes.

The petitioner also asserts that operating experience indicates that condenser-tube leaks have contaminated the reactor coolant water with impurities from the condenser cooling water and have caused extensive damage to nuclear power plant components. Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to

part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities" (see <http://www.nrc.gov/reading-rm/doc-collections/cfr/part050/part050-appb.html>), requires that plant owners develop and maintain quality-assurance programs.

The NRC observed that Entergy did not properly consider FitzPatrick's operating history, specifically the 4 years of outages, when projecting the expected condenser-tube life. Consequently, Entergy did not properly plan and design for condenser tube replacement before tube leakage, which has necessitated frequent downpowers for repair. Corrective actions include condenser-tube sleeving during the fall 2012 refueling outage and a planned complete replacement of all condenser tubes in the fall 2014 refueling outage.

The NRC sent a copy of the Proposed Director's Decision to the petitioner and the licensee for comments on June 27, 2014. The Petitioner and the licensee were asked to provide comments within 30 days on any part of the proposed Director's Decision that was considered to be erroneous or any issues in the petition that were not addressed. Comments were received from the Petitioner and are addressed in an attachment to the final Director's Decision.

The Director of the Office of Nuclear Reactor Regulation has determined that the request, to require the NRC to issue an Order requiring the licensee to replace all the condenser tubes prior to restart from FitzPatrick's fall 2014 refueling outage, be denied. The reasons for this decision are explained in the director's decision dated October 17, 2014, pursuant to 10 CFR 2.206 of the Commission's regulations.

The NRC will file a copy of the director's decision with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the Director's Decision will constitute the final action of the Commission 25 days after the date of the Decision unless the Commission, on its own motion, institutes a review of the director's decision in that time.
