

to grant management greater flexibility to base the factor weights on the requirements of the position.

Organizational Description

Of the 5,025 employees assigned to AFRL, the majority are located in/at Arlington VA, Brooks City Base TX, Edwards AFB CA, Eglin AFB FL, Hanscom AFB MA, Kirtland AFB NM, Rome NY, Tyndall AFB FL, and Wright-Patterson AFB OH. Employees are also located at locations around the world. At the time this Demonstration Project was implemented, there were four Air Force research laboratories. Later, these merged into AFRL, with 10 technical directorates, plus the AFRL Headquarters, each with a pay pool manager (total of 11 pay pools). There are currently 2,640 Scientists and Engineers (S&Es) in the Demonstration Project.

III. Personnel System Changes

Contribution-Based Compensation System

A. Change Section III.D.7, Weights, by replacing it in its entirety as follows:

7. Factor Weights

This Demonstration Project, in part, is predicated on the belief that the continued success and viability of the laboratory depends on all employees seeking to contribute in each of the areas defined by the CCS factors.

Job categories may be assigned based upon the majority of the duties of a position. The AFRL commander and directors have the option to apply varying weights to the CCS factors based on assigned job categories or other relevant position information (e.g. broadband level). If varying weights are not used, then all factors are considered to be weighted equally.

If varying weights are used they must be applied consistently within a pay pool. As an example, Technical Problem Solving may be more heavily weighted for bench-level S&Es than the factor of Communication. The overall CCS score is determined by multiplying the score for each factor by the weight, adding the results, and then dividing by the sum of the weights. Making all employees accountable for all factors shifts organizational values in new directions. For this reason, if factor weights are used, generally no factor should be given a weight of zero.

Factor weights should be reviewed annually to determine if those that are below 1.0 can be increased toward a weighting of 1.0 to encourage and allow employees to raise their CCS contribution assessment by contributing

in a broader range of activities. Contribution in the factors is important to ensure both the overall success of AFRL and individual S&E career growth.

Guidelines for establishing job categories and setting factor weights will be documented in AFRL implementing issuances.
