POLICY JUSTIFICATION**Egypt – RIM-116B Block 1A Rolling Airframe Missiles**

The Government of Egypt has requested a possible sale of up to 139 RIM-116B Block 1A Rolling Airframe Missiles (RAM) with MK-44 Guided Missile Round Packs, containers, support equipment, spare and repair parts, publications and technical data, maintenance, personnel training and training equipment, U.S. Government, contractor engineering and logistics technical support services, and other related elements of logistics support. The estimated cost is \$125 million.

This proposed sale would contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East. This sale is consistent with these U.S. objectives and with the 1950 Treaty of Mutual Cooperation and Security.

This proposed sale of 139 MK-116B Block 1A RAM and MK-44 Guided Missiles Round Packs (GMRP) provides the weapons employed by the MK-31 RAM Guided Missile Weapons System (GMWS) included on the Egyptian Fast Missile Craft (FMC). The RAM- GMWS and missile when coupled with the MK-15B PHALANX Close In Weapon System provides the FMC and the Egyptian Navy with effective defense against helicopters, anti-ship missiles, aircraft, and small surface craft. This capability is critical for the FMC to effectively provide security in the approaches to the Suez Canal and the Egyptian littoral.

The prime contractor will be Raytheon Systems Corporation, Tucson, Arizona. There are no offset agreements associated with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U. S. Government or contractor personnel in country.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 07-35

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act, as amended**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The Rolling Airframe Missile (RIM-116B) is delivered in a sealed container (MK 8 Launching Canister); together, these are designated as the MK-44 Guided Missile Round Pack (GMRP). The GMRP delivery includes tri-pack shipping containers and technical manuals.

2. The Rolling Airframe Missile is a surface-launched missile system. It is a highly effective near-in defense system against helicopters, anti-ship missiles/aircraft and small surface craft. The proposed sale of the RIM-116B RAM and the MK-44 GMRP will result in the transfer of classified information and material to Egypt.

3. The RIM-116B and MK-44 contains sensitive technology and have classified components, including applicable technical and equipment documentation and manuals: The RIM-116B Block 1A Rolling Airframe Missile (RAM) is Confidential when not installed in its canister. The Guidance section, seeker, Infrared electronics, guidance and control computer; Encrypted Telemeters and Target Detector are considered Confidential.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon systems effectiveness or could be used in the development of a system with similar or advanced capabilities.
