

U.S.C. 901 *et seq.*, provides for the payment of benefits to a coal miner who is totally disabled due to pneumoconiosis (black lung disease) and to certain survivors of the miner who died due to pneumoconiosis.

A miner who applies for black lung benefits must complete the CM-911 (application form). The completed form gives basic identifying information about the applicant and is the beginning of the development of the black lung claim. The applicant must complete a CM-911a at the same time the black lung application form is submitted. This form when completed is formatted to render a complete history of employment and helps to establish if the miner currently or formerly worked in the nation's coal mines. The person filing for benefits must have worked in the nation's coal mines or be a survivor of a coal miner as described under Title IV of the Federal Mine Safety and Health Act of 1977, as amended, in order for benefits to be pursued. This information collection is currently approved for use through September 30, 2008.
