The five projects operate continuously to generate electricity that is utilized at Warren's pulp and paper mill facilities in Westbrook, Maine. Under typical daily operations, Warren maximizes output by manually controlling of each of the five projects in response to flow inputs from Warren's upstream Eel Weir Project (FERC No. 2984), located at the outlet of Sebago Lake, and various minor tributaries to the Presumpscot River downstream of the Eel Weir Project. Daily impoundment level fluctuations of 2 feet or less typically occur at the Little Falls, Mallison Falls, and Saccarappa Projects, impoundment fluctuations of up to 1 foot per day occur at the Dundee and Gambo Projects.

1. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

IV. What Information Collection Activity or ICR Does this Action Apply to?

EPA is seeking comments on the following ICR:

Title: TSCA Section 8(a) Preliminary Assessment Information Rule.

ICR numbers: EPA ICR No. 0586.09, OMB No. 2070-0054.

ICR status: This ICR is currently scheduled to expire on December 31, 2000. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: TSCA section 8(a) authorizes EPA to promulgate rules under which manufacturers, importers and processors of chemical substances and mixtures must maintain records and submit reports to EPA. EPA has promulgated the Preliminary Assessment Information Rule (PAIR) under TSCA section 8(a). EPA uses PAIR to collect information to identify, assess, and manage human health and environmental risks from chemical substances, mixtures, or categories. PAIR requires chemical manufacturers and importers to complete a standardized reporting form to help evaluate the potential for adverse

human health and environmental effects caused by the manufacture or importation of identified chemical substances, mixtures, or categories. Chemicals identified by EPA or any other Federal agency, for which a justifiable information need for production, use or exposure-related data can be satisfied by the use of the PAIR are proper subjects for TSCA section 8(a) PAIR rulemaking. In most instances the information that EPA receives from a PAIR report is sufficient to satisfy the information need in question.

Responses to the collection of information are mandatory (see 40 CFR part 712). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

V. What are EPA's Burden and Cost Estimates for this ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to average 28.45 hours per response. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: Manufacturers and importers of chemical substances, mixtures, or categories.

Estimated total number of potential respondents: 48.

Frequency of response: On occasion.

Estimated average number of responses for each respondent: 2.4.

Estimated total annual burden hours: 3,355.

Estimated total annual burden costs: \$250,000.

VI. Are There Changes in the Estimates from the Last Approval?

There is a net decrease of 134 hours (from 3,489 hours to 3,355 hours) in the total estimated respondent burden compared with that identified in the information collection request most recently approved by OMB. This decrease is attributable to carrying through in the burden hour totals the adjustment made to the unit burden of the CBI substantiation requirement, which is that only 75% of sites or reports are expected to make CBI claims. This adjustment was made in the unit burden calculations in the previous ICR but was not carried through in the industry totals. In addition, a few minor mathematical corrections were made to the estimates in the previous ICR.

VII. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
