DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Support for Expanded HIV/AIDS Surveillance, Monitoring and Evaluation, and Information Management Activities in the Central American Region

Announcement Type: New.
Funding Opportunity Number: 04277.
Catalog of Federal Domestic Assistance Number: 93.941.

Key Dates:
Application Deadline: August 30, 2004.

I. Funding Opportunity Description

Authority: This program is authorized under Sections 307 and 317(k)(2) of the Public Health Service Act, [42 U.S.C. Sections 242l and 247b(k)(2)], as amended, and under Public Law 108-25 (United States Leadership Against HIV/AIDS, Tuberculosis and Malaria Act of 2003) [22 U.S.C. sections 7601 *et seq.*].

Purpose: The primary purpose of this funding announcement is to assist in increasing the capacity for, quality and coverage of HIV/AIDS-related Strategic Information activities undertaken at country level by Ministries of Health and their collaborating in-country partners, and to strengthen the coordination and implementation of region-wide activities that offer region-wide impact and economies of scale. This funding announcement targets the provision of support to specific countries within the Central American region (defined as Belize, Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica and Panama). Strategic Information is defined as programs and activities supporting the implementation of first and second generation epidemiological surveillance surveys, systems for

monitoring and evaluation of multi-sectoral national responses to HIV/AIDS, and strategic initiatives to improve infrastructure and systems supporting surveillance, care and treatment, laboratory and information management activities.

Programs, activities and services to be supported through this agreement may include but are not limited to:

- Planning, resource, and implementation support of specific surveillance activities for HIV/AIDS and HIV/AIDS-related conditions;
- Training and capacity building of staff from Ministries of Health, other government Ministries, National Global Fund to Fight AIDS, TB and Malaria (GFATM)-related entities, and civil society organizations;
- Regional and/or sub-regional meetings, conferences and travel supporting the exchange of relevant information and best practices; and
- Recruitment and assignment of short and/or long-term staff and consultants to support relevant activities at country level.

This will be accomplished by funding a regional non-governmental organization (NGO) to provide planning, resource and implementation support to Ministries of Health and their collaborating in-country partners. The regional NGO recipient, based on plans of action developed jointly with CDC and national partners, will be responsible for assisting Ministries of Health and their partners to mobilize for the implementation of expanded Strategic Information activities, through the provision of resources, training and logistical assistance. The CDC Global AIDS Program (GAP) Regional Office for Central America, based in Guatemala City, will collaborate closely with the regional NGO recipient in the design and implementation of these supportive activities as important components of CDC/GAP's annual work plan for HIV/AIDS assistance to countries within the Central American region.

These activities will contribute and lead to: (1) Implementation of existing U.S. Government-supported regional strategic plans for expanded epidemiological surveillance of HIV/AIDS and HIV-related conditions; (2) improved networking, conferencing and communications among and between national HIV/AIDS epidemiologists, program managers and laboratorians from countries within the region; (3) improved national capacity to implement national strategic plans for surveillance of HIV/AIDS and HIV-related conditions; (4) improved national capacity to support the design

and implementation of periodic HIV/AIDS surveillance surveys to evaluate behavioral and/or prevalence measures at national, regional, or sub-population levels; (5) improved national systems for HIV/AIDS case reporting, data collection, data management and data analysis, including necessary hardware and software requirements; (6) strengthened national capacities for monitoring and evaluation of the national response to HIV/AIDS, particularly in the context of collecting, managing and analyzing information; and (7) strengthened human capacity at national level for planning, implementation and evaluation of Strategic Information activities.

Measurable outcomes of the program will be in alignment with goals of the CDC National Center for HIV, STD and TB Prevention, Global AIDS Program (GAP) to initiate, expand, or strengthen HIV/AIDS prevention, care and treatment and support activities globally.
