**SUPPLEMENTARY INFORMATION:** The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will consider the entire spectrum of intervention objects, including deterrence, dissuasion, remote pre-detonation, remote disarming, elimination of sources and/or manufacturing facilities, discovery and remove of critical personnel, discovery and removal of employed devices, or anything else that has the end effect of either lowering the value or raising the cost of employing IEDs as an insurgent or terrorist weapons of choice. The Task Force will have four primary objectives: Assess the current state of the art of allied forces in countering adversary use of IEDs in operations such as OIF; recommend a mid- to long-term set of integrated activities aimed at improving the state of the art in reducing the effect of IEDs over the next three to ten years; provide recommendations on short term (over the next six months to three years) incremental improvements in U.S. forces' ability to counter or reduce the effectiveness of IEDs, and identify any synergies that may exist between current counter-IED and countermine efforts.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. 2), it has been determined that this Defense Science Board Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) and that, accordingly, this meeting will be closed to the public.
