k. *Description of Request:* The Kings River Conservation District (KRCD), filed an application for a non-capacity amendment of the license to add a 6.3 megawatt generating unit. The existing project license authorizes the KRCD to utilize three penstocks installed in the U.S. Army Core of Engineers, Pine Flat Dam. The Jeff L. Taylor Powerhouse, located at the toe of the dam, contains three 55 MW Francis turbines, and generates electricity with run of the river flows ranging from 500 to 8,000 cubic feet per second (cfs). To maintain downstream cold water flows, a non-project bypass system releases 900 cfs when the penstocks are not open. KRCD proposes to add an additional generating unit to the bypass system that would increase generation capacity

from 165 MW by 3.8% to a total of 171.3 MW. This generator would allow for power generation at flows below 500 cfs.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. k. Topsham Hydro Partners Limited Partnership (L.P.) (Topsham Hydro) filed a Settlement Agreement for Modified Prescription for Fishways executed by and between the licensee and the U.S. Department of Interior's U.S. Fish and Wildlife Service. The purpose of the agreement is to resolve the parties' disagreements over the appropriate terms of a prescription for fishways for upstream and downstream passage of American eel at the project under the new license. Topsham Hydro requests that the Commission consider the Settlement Agreement in its environmental analysis of the project relicensing, acknowledge the Offer of Settlement, and incorporate the terms of the agreement which will be reflected in the modified fishway prescription in the new license for the project. The Settlement Agreement details the terms of the modified prescription for upstream and downstream passage of American eel at the project to be filed by the Department within 60 days after the deadline for filing comments on the Commission's draft environmental document. With respect to downstream passage of American eel, the Agreement provides for both interim and permanent downstream passage measures, based on the outcome of studies to be conducted by Topsham Hydro, as well as effectiveness testing of those interim and permanent measures. With respect to upstream passage of American eel, the Agreement includes temporary upstream passage measures, permanent upstream passage measures, and effectiveness testing of those permanent measures.
