

proposed action would result in the licensee disposing of certain retired MRCs using funds other than those in the DTFs, which would have no change in current environmental impacts, or would result in the licensee building a new long-term onsite storage facility at ANO, which would have environmental impacts. Therefore, the alternative action would have similar or additional environmental impacts than the proposed action.

Alternative Use of Resources

There are no unresolved conflicts concerning alternative uses of available resources under the proposed action.

Agencies and Persons Consulted

No additional agencies or persons were consulted regarding the environmental impact of the proposed action.

III. Finding of No Significant Impact

The requested exemptions from 10 CFR 50.82(a)(8)(i) and (ii) would allow the licensee to withdraw a small portion of the funds from the ANO, Units 1 and 2 DTFs to facilitate the prompt disposal of certain retired MRCs. The proposed action would not significantly affect plant safety, would not have a significant adverse effect on the probability of an accident occurring, and would not have any significant radiological or non-radiological impacts. The proposed action involves exemptions from requirements that are of a financial nature and that would not have an impact on the human environment. Consistent with 10 CFR 51.21, the NRC conducted an EA for the proposed action, and this FONSI incorporates by reference the EA included in section II of this document. Therefore, the NRC concludes that the proposed action will not have significant effects on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Other than the licensee's letter dated November 13, 2024, there are no other environmental documents associated with this review.

Previous considerations regarding the environmental impacts of operating ANO, Units 1 and 2 are described in NUREG-1437, Supplement 3, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding the Arkansas Nuclear One, Unit 1," dated April 2001 (ADAMS Accession No. ML011170034), and NUREG-1437, Supplement 19, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants

Regarding Arkansas Nuclear One, Unit 2," dated April 2005 (ADAMS Accession No. ML051080538).
