BILLING CODE 7535-01-M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory
Commission (NRC).

ACTION: Notice of pending NRC action to
submit an information collection
request to OMB and solicitation of
public comment.

SUMMARY: The NRC is preparing a
submittal to OMB for review of
continued approval of information
collections under the provisions of the
Paperwork Reduction Act of 1995 (44
U.S.C. Chapter 35).

Information pertaining to the
requirement to be submitted:

1. *The title of the information
collection:* 10 CFR Part 55, "Operators'
Licenses".

2. *Current OMB approval number:*
3150-0018.

3. *How often the collection is
required:* As necessary for NRC to meet
its responsibilities to determine the
eligibility of applicants for operators'
licenses, prepare or review initial
operator licensing and requalification
examinations, and review applications
for and performance of simulation
facilities.

4. *Who is required or asked to report:*
Holders of and applicants for facility
(i.e., nuclear power, research, and test
reactor) operating licenses and
individual operators' licenses.

5. *The number of annual respondents:*
106.

6. *The number of hours needed
annually to complete the requirement or
request:* 65,586 (approximately 44,736
hours of reporting burden and
approximately 20,850 hours of
recordkeeping burden).

7. *Abstract:* 10 CFR Part 55,
"Operators' Licenses," of the NRC's
regulations, specifies information and
data to be provided by applicants and
facility licenses so that the NRC may
make determinations concerning the
licensing and requalification of
operators for nuclear reactors, as
necessary to promote public health and
safety. The reporting and recordkeeping

requirements contained in 10 CFR Part
55 are mandatory for the licensees and
applicants affected.

Submit, by February 14, 2003,
comments that address the following
questions:

1. Is the proposed collection of
information necessary for the NRC to
properly perform its functions? Does the
information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the
quality, utility, and clarity of the
information to be collected?

4. How can the burden of the
information collection be minimized,
including the use of automated
collection techniques or other forms of
information technology?

A copy of the draft supporting
statement may be viewed free of charge
at the NRC Public Document Room, One
White Flint North, 11555 Rockville
Pike, Room O-1 F23, Rockville, MD
20852. OMB clearance requests are
available at the NRC worldwide web
site: [http://www.nrc.gov/public-involve/
doc-comment/omb/index.html](http://www.nrc.gov/public-involve/doc-comment/omb/index.html). The
document will be available on the NRC
home page site for 60 days after the
signature date of this notice.

Comments and questions about the
information collection requirements
may be directed to the NRC Clearance
Officer, Brenda Jo. Shelton, U.S. Nuclear
Regulatory Commission, T-6 E6,
Washington, DC 20555-0001, by
telephone at 301-415-7233, or by
Internet electronic mail at
INFOCOLLECTS@NRC.GOV.

Dated at Rockville, Maryland, this 9th day
of December 2002.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

*NRC Clearance Officer, Office of the Chief
Information Officer.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-261]

Carolina Power & Light Company; H. B. Robinson Steam Electric Plant, Unit No. 2; Exemption

1.0 Background

Carolina Power & Light Company
(CP&L) is the holder of Facility
Operating License No. DPR-23, which
authorizes operation of the H. B.
Robinson Steam Electric Plant, Unit No.
2 (HBRSEP2). The license provides,
among other things, that the facility is
subject to all rules, regulations, and
orders of the U.S. Nuclear Regulatory

Commission (NRC, the Commission)
now or hereafter in effect.

The facility consists of a pressurized-
water reactor located in Darlington
County, South Carolina.

2.0 Request/Action

Pursuant to 10 CFR 55.59(c), a
facility's licensed operator
requalification program must be
conducted for a continuous period not
to exceed 2 years (24 months) and upon
conclusion must be promptly followed,
pursuant to a continuous schedule, by
successive requalification programs.
Each 2-year requalification program
must include a comprehensive biennial
written examination and annual
operating tests.

By letter dated October 11, 2002,
CP&L requested a one-time exemption
from the schedular requirements of 10
CFR 55.59(c). Specifically, for
HBRSEP2, CP&L has requested a one-
time extension from December 31, 2002,
to March 31, 2003, for completing the
licensed operator requalification annual
operating test and comprehensive
biennial written examination. This
requested exemption would allow an
extension of 3 months beyond the
schedule for completion of the operating
test and written examination as required
by 10 CFR 55.59(c). CP&L's letter
constitutes a request for exemption
under 10 CFR 55.11, which states: "The
Commission may, upon application by
an interested person, or upon its own
initiative, grant such exemptions from
the requirements of the regulations in
this part as it determines are authorized
by law and will not endanger life or
property and are otherwise in the public
interest." The exemption is being
requested for HBRSEP2 due to an
unusually high workload associated
with a plant refueling outage (RFO21)
and a power uprate project, which
occurred just prior to the originally
scheduled examinations. Due to the
refueling outage and power uprate
activities, which included modifying
the plant-specific simulator and
extensive training of personnel on new
and modified procedures, development
and administration of the written
examination and operating test within
the required schedule is viewed as a
schedule and workload hardship by the
licensee.

3.0 Discussion

Pursuant to 10 CFR 55.11, the
Commission may, upon application by
an interested person, or upon its own
initiative, grant such exemptions from
the requirements of the regulations in
this part as it determines are authorized
by law and will not endanger life or

property and are otherwise in the public interest.

The Commission has determined that, pursuant to 10 CFR 55.11, granting an exemption to the facility licensee from the schedular requirements in 10 CFR 55.59(c) by allowing HBRSEP2 a one-time extension in the allowed time for completing the licensed operator requalification annual operating test and comprehensive biennial written examination is authorized by law and will not endanger life or property and is otherwise in the public interest. Although the schedular requirements of 10 CFR 55.59(c) at HBRSEP2 will be exceeded, operator performance continues to be satisfactory, as demonstrated both in the plant and during other aspects of operator requalification training. Granting this exemption will allow HBRSEP2 to continue with safe plant operations during the refueling outage, which includes a power uprate project, without undue hardship to plant personnel and HBRSEP2 licensed operators.

4.0 Conclusion

Accordingly, the Commission hereby grants the facility licensee an exemption on a one-time basis from the schedular requirements of 10 CFR 55.59(c) to allow the current HBRSEP2 requalification program to be extended beyond the 24 months, from December 31, 2002, to March 31, 2003. The NRC understands that, following the completion of the operating test and written examination, the next 24-month licensed operator requalification program will begin on April 1, 2003, and continue for a 24-month period.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (67 FR 72983).

This exemption is effective upon issuance and expires on March 31, 2003.

Dated at Rockville, Maryland, this 10th day of December, 2002.

For the Nuclear Regulatory Commission.

Bruce A. Boger,

Director, Division of Inspection Program Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 040-00017]

Notice of Consideration of Amendment Request for the Dow Chemical Company, Midland, MI and Opportunity for Providing Comments and Requesting a Hearing

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Material License No. STB-527 issued to The Dow Chemical Company (Dow), to authorize decommissioning of its Bay City Site Decommissioning Management Plan (SDMP) site in Bay City, Michigan.

Dow began using thorium metal and compounds in 1956 for the production of magnesium-thorium alloys at a Dow-owned site in Bay City, Michigan. The waste slag from the alloying process was disposed of on Dow property in Bay City. Magnesium-thorium material returned by Dow customers was received at Dow's Midland, MI, site for storage. The decommissioning plan (DP) submitted by Dow to decommission the two (Midland and Bay City) sites was approved by a license amendment on July 19, 1996 (Amendment 6). The Midland site was remediated and removed from the license on March 3, 2000 (Amendment 8). After remediating about 31 acres of the 40 acre contaminated area at the Bay City site, Dow proposed, in March 2001, a different approach and conceptual plan for remediating the remaining nine acres. According to Dow, the reason for the change in the approach is that the decommissioning cost is expected to be too high under the previously approved DP. In August 2001, Dow submitted a Supplement to the previously (1996) approved DP. This Supplement was rejected in September 2001 because it was found to be administratively deficient for a detailed technical review. Dow submitted a revised Supplement on January 31, 2002. On July 19, 2002, Dow submitted Attachment 1 to the January 31, 2002, revised Supplement. An NRC administrative review, documented in a letter to Dow dated August 5, 2002, found the revised Supplement acceptable to begin a technical review.

If the NRC approves the revised Supplement, the approval will be documented in an amendment to NRC License No. STB-527. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's

regulations. These findings will be documented in a Safety Evaluation Report and either an Environmental Assessment or an Environmental Impact Statement.

II. Opportunity To Provide Comments

The NRC is providing notice to individuals in the vicinity of the site that the NRC is in receipt of a revised Supplement to the DP, and will accept comments concerning this decommissioning proposal and its associated environmental impacts. Comments with respect to this action should be provided in writing within 30 days of this notice and addressed to M. (Sam) Nalluswami, Project Manager, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone: (301) 415-6694, fax number (301) 415-5398, e-mail: smn@nrc.gov. Comments received after 30 days will be considered if practicable to do so, but only those comments received on or before the due date can be assured consideration.

III. Opportunity To Request a Hearing

NRC also provides notice that this is a proceeding on an application for an amendment of a license falling within the scope of Subpart L, "Informal Hearing Procedures for Adjudication in Materials Licensing Proceedings," of NRC's rules and practice for domestic licensing proceedings in 10 CFR Part 2. Whether or not a person has or intends to provide comments as set out in section II above, pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(d). A request for a hearing must be filed within thirty (30) days of the date of publication of this **Federal Register** notice.

The request for a hearing must be filed with the Office of the Secretary either:

1. By delivery to the Rulemakings and Adjudications Staff of the Office of the Secretary, U.S. Nuclear Regulatory Commission, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852-2738, between 7:45 a.m. and 4:15 p.m., Federal workdays; or

2. By mail or telegram, addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Attention: Rulemakings and Adjudications Staff. Because of continuing disruptions in the delivery of mail to United States Government offices, it is requested that requests for hearing be also transmitted to the
