SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0995.

Title: Section 1.2105, Bidding Application and Certification Procedures; Prohibition of Certain Communications.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and State, local or Tribal government.

Number of Respondents: 10 respondents; 10 responses.

Estimated Time per Response: 1.5 hours to 2 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 154(i) and 309(j).

Total Annual Burden: 50 hours.

Total Annual Cost: \$6,000.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: The Commission is not requesting that the respondents submit confidential information to the Commission. If the Commission requests applicants to submit information that the respondents believe is confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them. The Commission is requesting an extension (no change in the reporting requirements) of this information collection. There is no change in the Commission's burden estimates.

Subject to certain exceptions, section 1.2105(c) of the Commission's rules prohibits auction applicants that are eligible to bid on any of the same geographic areas from cooperating or collaborating with respect to, discussing or disclosing to each other in any manner the substance of their bids or bidding strategies from the short-form application filing deadline to the post-auction down payment deadline, unless such applicants are members of a bidding consortium or other joint bidding agreement reported on their short-form applications.

The Commission has found that even when a communication of bids or bidding strategies is limited to one applicant's bids or bidding strategies, it may unfairly disadvantage the other bidders in the market by creating an asymmetry of information. Section 1.2105(c)(1) of the Commission's rules attempts to address this concern by prohibiting auction applicants from communicating their bids or bidding strategies to each other. In enforcing Section 1.2105(c)(1), however, the Commission has encountered auction

applicants engaging in communications prohibited by the rule. In some instances, there has been concern expressed about the obligation of a bidder to report information received from another bidder that potentially violates the rule, and the Commission has previously counseled applicants on the safest course of action for a recipient of a prohibited communication during the period in which Section 1.2105(c)(1) prohibitions are in effect would be to terminate the discussion and promptly report communication to the Commission. The Commission believes that the anti-collusion rule to include such a reporting requirement, as a deterrent to would-be disseminators of prohibited information regarding bids or bidding strategies, will make clear the responsibility to report such behavior and will thereby enhance the competitiveness and fairness of its spectrum auctions. Under the amendment the Commission adopted in the *Seventh Report and Order*, an applicant's failure to report a prohibited communication pursuant to Section 1.2105(c) may constitute a rule violation distinct from any act of collusion that violates Section 1.2105(c)(1).

The information requirement will enable the Commission to ensure that no bidder gains an unfair advantage over other bidders in its spectrum auctions and thus enhance the competitiveness and fairness of its auctions. The information collected will be reviewed, and if warranted, referred to the Commission's Enforcement Bureau for possible investigation and administrative action. The Commission may also refer allegations of anticompetitive auction conduct to the Department of Justice (DoJ) for investigation.

OMB Control Number: 3060-0221.

Title: Section 90.155, Time in Which Station Must Be Placed in Operation.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit and State, local or Tribal government.

Number of Respondents: 1,589 respondents; 1,589 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 154(i), 161, 303(g), 303(r) and 332(c)(7).

Total Annual Burden: 1,589 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them. The Commission is requesting an extension (no change in the reporting requirements) of this information collection. The Commission is reporting a 179 hour burden reduction adjustment in the Commission's previous burden estimates. The reduction is due to fewer respondents and therefore the burden hours have been adjusted.

Section 90.155(b) provides that a period longer than 12 months may be granted to local government entities to place their stations in operation on a case-by-case basis upon a showing of need. This rule provides flexibility to State and local governments. An application for extension of time to commence service may be made on FCC Form 601. Extensions of time must be filed prior to the expiration of the construction period. Extensions will be granted only if the licensee shows that the failure to commence service is due to causes beyond its control.

Section 90.155(d) establishes construction deadlines for Location and Monitoring Service (LMS) licensees in the market-licensed multilateration LMS services. This subsection was amended in 2004 to provide holders of multilateration location service authorizations with five- and ten-year benchmarks to place in operation their base stations that utilize multilateration technology to provide multilateration location service to one-third of the Economic Areas (EAs) population within five years to initial license grant, and two-thirds of the population within ten years. At the five- and ten-year benchmarks, licensees are required to file a map and FCC Form 601 showing compliance with the coverage requirements pursuant to section 1.946 of the Commission's rules.

In 2007 the Commission granted two to three additional years to meet the five-year construction requirement for certain multilateration Location and Monitoring Service Economic Area licensees, and extended the 10-year requirement for such licensees two years.

These requirements will be used by Commission personnel to evaluate whether or not certain licensees are providing substantial service as a means of complying with their construction requirements, or have demonstrated that

an extended period of time for construction is warranted.
