II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Part 55 Exemption Request and Part 55 Research and Test Reactor Exemption Request.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on May 13, 2020 (85 FR 28667).

1. *The title of the information collection:* “Part 55 Exemption Request and Part 55 Research and Test Reactor Exemption Request.”

2. *OMB approval number:* 3150-0018.

3. *Type of submission:* Extension.

4. *The form number if applicable:* There is no form number for the online submission form.

5. *How often the collection is required or requested:* On occasion.

6. *Who will be required or asked to respond:* All holders of, and certain applicants for, nuclear power plant construction permits and operating licenses under the provisions of part 50 of title 10 of the *Code of Federal*

Regulations (10 CFR part 50), “Domestic Licensing of Production and Utilization Facilities” who seek exemptions from the requalification requirements specified in 10 CFR 55.59 as allowed by 10 CFR 55.11, “Specific Exemptions.”

7. *The estimated number of annual responses:* 60.

8. *The estimated number of annual respondents:* 60.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 120.

10. *Abstract:* The NRC requested an emergency review of this information collection in order to add this form to the previously approved information collection OMB Control Number 3150-0018 for a period of 6 months. The purpose of this information collection is to request an extension of the approval of the “Part 55 Exemption Request and Part 55 Research and Test Reactor Exemption Request” online forms that simplify the filing the exemption requests because the existing system may be burdensome for licensees under current conditions. Under the existing collection under OMB Control No. 3150-0018, licensees are already able to seek exemptions from the requirements of 10 CFR part 55, Operators’ Licenses. This information collection only addresses the incremental burden change to this existing clearance due to the form and not the total burden for the clearance.

10 CFR part 55 contains specific requirements for the licensing of utilization facility operators and senior operators. Due to the impacts of the COVID-19 public health emergency (PHE), the NRC will also consider exemption requests for operators and senior operators from the requirements in 10 CFR 55.59(a)(1) (requiring the operators and senior operators to successfully complete the Commission-approved requalification program) and in 10 CFR 55.59(a)(2) (requiring the operators and senior operators to pass a comprehensive requalification written examination and an annual operating test); these exemptions would allow delay of these requalification program requirements during the COVID-19 PHE as allowed by 10 CFR 55.11, “Specific Exemptions.”

Dated: August 28, 2020.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
