BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) is publishing this notice of petitions received under the National Vaccine Injury Compensation Program ("the Program"), as required by Section 2112(b)(2) of the Public Health Service (PHS) Act, as amended. While the Secretary of Health and Human Services is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Court of Federal Claims is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program in general, contact the Clerk, United States Court of Federal Claims, 717 Madison Place, NW., Washington, DC 20005; (202) 219-9657. For information on HRSA's role in the Program, contact the Director, National Vaccine Injury Compensation Program, 5600 Fishers Lane, Room 16C-17, Rockville, MD 20857; (301) 443-6593.

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of Title XXI of the PHS Act, 42 U.S.C. 300aa-10 *et seq.*, provides that those seeking compensation are to file a petition with the U.S. Court of Federal Claims and to serve a copy of the petition on the Secretary of Health and Human Services, who is named as the respondent in each proceeding. The

Secretary has delegated his responsibility under the Program to HRSA. The Court is directed by statute to appoint special masters who take evidence, conduct hearings as appropriate, and make initial decisions as to eligibility for, and amount of, compensation.

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table (the Table) set forth at Section 2114 of the PHS Act or as set forth at 42 CFR 100.3, as applicable. This Table lists for each covered childhood vaccine the conditions which will lead to compensation and, for each condition, the time period for occurrence of the first symptom or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the Table and for conditions that are manifested after the time periods specified in the Table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa-12(b)(2), requires that the Secretary publish in the **Federal Register** a notice of each petition filed. Set forth below is a list of petitions received by HRSA on July 1, 2002, through September 30, 2002.

Section 2112(b)(2) also provides that the special master "shall afford all interested persons an opportunity to submit relevant, written information" relating to the following:

1. The existence of evidence "that there is not a preponderance of the evidence that the illness, disability, injury, condition, or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition," and

2. Any allegation in a petition that the petitioner either:

(a) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Table but which was caused by" one of the vaccines referred to in the Table, or

(b) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine" referred to in the Table.

This notice will also serve as the special master's invitation to all interested persons to submit written information relevant to the issues described above in the case of the

petitions listed below. Any person choosing to do so should file an original and three (3) copies of the information with the Clerk of the U.S. Court of Federal Claims at the address listed above (under the heading "For Further Information Contact"), with a copy to HRSA addressed to Director, Division of Vaccine Injury Compensation Program, Office of Special Programs, 5600 Fishers Lane, Room 16C-17, Rockville, MD 20857. The Court's caption (Petitioner's Name v. Secretary of Health and Human Services) and the docket number assigned to the petition should be used as the caption for the written submission.

Chapter 35 of title 44, United States Code, related to paperwork reduction, does not apply to information required for purposes of carrying out the Program.

List of Petitions

1. Carla Lowry on behalf of Tyler Lowry; Boston, Massachusetts; Court of Federal Claims Number 02-0753V
2. Scott Bagby on behalf of Trenton Bagby; Adrian, Missouri; Court of Federal Claims Number 02-0754V

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; telephone: 301/496–7057; fax: 301/402–0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Fibroblast Growth Factor 3 (FGFR3) Receptor Knockin Mice

Dr. Chuxia Deng (NIDDK), DHHS Reference No. E–060–2003/0—Research Tool.

Licensing Contact: Marlene Shinn-Astor; 301/435–4426; shinnm@od.nih.gov.

Missense mutations in Fibroblast Growth Factor Receptor 3 (FGFR3) result in several human skeletal dysplasias, including the most common form of dwarfism, achondroplasia.

The NIH announces the generation of FGFR3 knockin mice, which have a Gly369Cys mutation, inserted into the mouse genome. Phenotypic analysis of the mice reveals that the FGF/FGFR3 signals affect both chondrogenesis and osteogenesis by regulating Stat proteins and cell-cycle inhibitors, and the activities of chondrocytes, osteoclasts, and osteoblasts during endochondral ossification. These mice provide a new animal model to study functions of FGF/FGFR3 signals in achondroplasia patients, which could lead to new drug discovery and therapeutic treatments.

Compositions and Methods for Inhibiting Group B Streptococcal-Induced Pulmonary Hypertension in Neonates

Rodney L. Levine et al. (NHLBI), DHHS Reference No. E–259–2002/0 filed Oct. 15, 2002.

Licensing Contact: Susan Ano; 301/435–5515; anos@od.nih.gov.

Group B streptococcus (GBS), the most common cause of sepsis and meningitis in human newborns, often results in respiratory distress. The underlying cause of this distress is pulmonary hypertension, historically believed to be induced by increased production of thromboxane A2 as stimulated by GBS. The technology described here reveals that the phospholipids cardiolipin and phosphatidylglycerol are causative agents of GBS-induced pulmonary hypertension. Furthermore, the technology describes administration of these phospholipids or immunogenic fragments thereof in an appropriate fashion to elicit an immune response, including administration as conjugates to hapten to enhance the binding selectivity of the resulting antibodies. Additionally, administration of antibodies to these phospholipids for the same purpose is related. The phospholipids or immunogenic fragments can also be administered in a dose-dependent manner to increase blood pressure in pulmonary arteries. Kits for administration of these phospholipids and/or anti-phospholipid antibodies are also described. The standard treatment for GBS infection is the penicillin class of antibiotics, which increases the synthesis and excretion of the two phospholipids revealed in this technology to cause pulmonary hypertension. Thus, the current technology offers a potential improvement over existing treatments.

In the course of the research that led to the above discovery, a method of separating recombinantly expressed membrane-bound proteins and membrane-associated endotoxin in gram-negative prokaryote expression systems was also developed.

p-Toluenesulfonhydrazide Derivatization for Separation and Measurement of Endogenous Estrogen Metabolites by High-Pressure Liquid Chromatography-Electrospray-Mass Spectrometry

Dr. Xia Xu (NCI), U.S. Provisional Patent Application 60/372,848 filed Apr. 15, 2002.

Licensing Contact: Brenda Hefti; 301/435–4632; heftib@od.nih.gov.

The current invention relates to a method for measuring endogenous estrogen levels, and this technology may be generalizable to all endogenous ketolic steroids, including estrogens, androgens, and phytoestrogens.

Specifically, the current invention is a derivatization technique that forms estrogen-p-toluenesulfonhydrazones, which can be separated and then measured using high-pressure liquid chromatography-electrospray-mass spectrometry (HPLC–ESI–MS). This method offers a number of improvements over current methods. It is more sensitive, it is faster, it is more accurate, and it requires a smaller sample size.

FXR/BAR Knockout Mouse Model

Frank Gonzalez (NCI), DHHS Reference No. E–323–2001/0—Research Tool.

Licensing Contact: Marlene Shinn-Astor; 301/435–4426; shinnm@od.nih.gov.

Cholesterol lowering drugs are being prescribed more and more as a way to combat high cholesterol levels associated as a precursor to heart disease. The NIH announces a new knockout mouse model that lacks the nuclear receptor FXR/BAR (bile acid receptor). The receptor controls the synthesis and transport of bile salts, which are degradation products of cholesterol. These mice could, therefore, be used to test new targets for cholesterol lowering drugs that use a new mechanism which is distinct from the current statin drugs that control HMG CoA reductase.

Telomerase Immortalized Hepatocyte Cell Lines

Xin W. Wang and Curtis Harris (NCI), DHHS Reference No. E–251–2000/0—US–01 filed Dec. 14, 2000.

Licensing Contact: Catherine Joyce; 301/435–5031; joycec@od.nih.gov.
